Index

Compressor lubrication, 120, 123, 124
burned, 237
Compressor service valves, 118–20
Compressor speed, commercial, 394
Compressors, 112–31. See also individual types in commercial refrigeration systems, 424–26
construction of, 114–20
defined, 80
diagnosing problems in running time of, 253–54
hermetic, motor burnout in, 424–25
refrigerant oil in, 92–93
in residential air conditioning systems, 290–92, 302–5
starting, 57–58
in room air conditioners, 277–78, 282
in sealed systems, inefficient, 239–40
in sealed systems, nonfunctioning, 219
suction pressure of, 386–87
testing and charging oil level of a sealed system, 232–33
testing efficiency of sealed systems, 231–32
Computers in the HVACR business, 434. See also Software for HVAC/R business
Condensate removal lines, 299
Condenser coils in heat pumps, 336, 339
in residential air conditioning systems, 292
in room air conditioner, 278
Condenser fan and condenser fan motor in residential air conditioners, 292, 302–3, 305
Condenser water flow, 136–37
Condensers, 132–47
air-cooled, low ambient discharge pressure control for, 379–81
defined, 80
factors affecting heat transfer in, 132–33
fan motors of, 26–70
in hermetically sealed systems, 194–95
Condensing furnace, 323–24
Condensing pressure, 86
Condensing unit for air conditioners, 295–96
checked during preseason checking procedures, 300
connected to the evaporator, 297–99
Condensing unit for commercial refrigeration systems, 373
Conduction defined, 76
Conductor atom, 26
Conductors defined, 26, 76
Connecting rod between the piston and crankshaft, 116
Constant superheat valve, 162–75
Constricting tubing, 101
Contactors, 54–55
Control contacts on thermostats, 251–52
Control differential for thermostats, 252
Convection defined, 76
Cooling anticipators, 359–60
Crankcase of a compressor, 114
testing and charging oil level of a sealed system, 232–33
Crankcase heater, 341–42, 395–96
Crankcase pressure regulator (CPR) valves, 381–83
adjusting, 383
installing, 382–83
operation of, 382
Crankshaft of a compressor, 115–16
Crankcase seals, 116–17
Crescent (adjustable open end) wrenches, 9
Critical pressure of a refrigerant, 86
Critical temperature of a refrigerant, 86
Cross charged thermostatic expansion valve, 166–67
Current, 51–32
Current relay, 56
Customer relations for HVAC/R technicians, 437–39
Cut-in point and cut-out point on thermostats, 252
Cylinder head of a compressor, 116
Cylinders, safety rules for handling, 3–4
recovery, 205–6
D
Decimals, 19
Deep vacuum, measuring, 421–22
Defrost clock-timers, 260–61
Defrost heaters, 260–61
Defrost limit switch, 260
Defrosting systems, 255–61
for commercial refrigeration systems, 402–7
components of, 257–61
types of, 255–57
Dehydrating a refrigeration or air conditioning system, 231
Delta winding, 63
Density of a refrigerant, 87
Department of Transportation (DOT), U.S., regulation of refillable cylinders by, 204
Desuperheating process, 132
for expansion valves, 392–94
Dew point
defined, 151
of entering air for evaporators, 148–49
of leaving air for evaporators, 150
 Dichloroethylene (R-1130), 88
 Dichlorodifluoromethane (R-12), 87, 90, 201
 in TEV or TXV, 163
 Dichlorotetrafluoroethane (R-114), 201
 Dichlorotrifluoroethane (R-113), 201
 Dielectric strength of refrigerant oil, 92–93
 Direct current (DC), 44–45
 conversion of AC in spark ignition system to, 318
 Direct drive air handler, 314
 Discharge compression pressure controls, 379–81
 Disconnect switches, 51–52
 Display cases, 370–73
 Distribution pan, 139–40
 Dividend defined, 18
 Division of whole numbers, 18
 Divisor defined, 18
 Double duty display case, 372
 Double tube condenser, 134–35
 Downstream pressure, 3
 Drain heaters, 261
 Drain trough of refrigeration heaters for, 270
 water freezing in, 220
 Drift, 139
 Dry expansion evaporators, 148–49
E Electric defrosting of evaporator coil, 256–57, 406–7
Electric furnaces, 327–35
 components of, 328–33
cost of operating, 328
design of, 327–28
heating elements of, 328–29
method of operation of, 327
wiring diagram for, 351–32
Electric ignition system for gas furnaces, 318
Electric motors, cycle of operating of, 58–59
Electric regulating valve for water, 141–43
Electrical circuits, 32–33
Electrical disconnect switches, 35–36
Electrical power
formula used by utility company to determine the cost of, 47
measurement of, 45
Electrical safety, 2–3
Electrical shock, listing of milliamperes and severity of, 2
Electrical system components, HVAC/R, 50–68
Electricity, 24–68
defined, 24
producing, 27–30
Electrodes defined, 28
Electromagnetic force (EMF), 30
Electromagnetism, 30
Electron theory, 24
Electronic leak detector, 234–35
Electronic sight glass, 418
Electronic thermostat, 357
Electrons, 25–26
Electric static fields, 26
Elements defined, 24
Eliminators in forced draft water cooling towers, 140
Emergency heat setting on heat pump thermostat, 345
Energy defined, 71–72. See also individual types
Energy efficiency ratio (EER) of heat pumps, 344
of room air conditioners, 276–77
Enthalpy, 87
Environmental Protection Agency (EPA) examination for HVAC/R technicians, 430–31
Ethane (R-170), 88
Ethyl chloride (R-160), 88
 Evacuating a sealed system, 229–32
defined, 229
into external cylinder, 230–31
triple evacuation in, 231
Evacuating commercial HVAC systems, 421–22
Evacuating refrigerant storage systems, 206
Evaporative condensers, 132, 143–44
Evaporator coil or tubing defrosting, 255–61, 402–7
filter for, 278
in heat pumps, 336, 339
reparing aluminum, 243–44
in residential air conditioning systems, 292, 296–99
in room air conditioners, 278
Evaporator fan
Liquid charged thermostatic expansion valve, 494
Liquid charging
of a commercial system, 420
of a sealed system, 224–27, 242
Liquid flooding, 395
Liquid length, 158
Liquid level test valve, 418–19
Liquid lines for commercial refrigeration systems, 401
Liquid receiver, 179–80
Liquid slugging, 394–95
Low-pressure controls (LPCs)
in air conditioning system, 363–64
in commercial refrigeration system, 388–90

M
Magnetic circuit breaker, 33, 35
Magnetic line starters, 55
Magnetism, 30
Makeup
Magnetism, 30
Makeup water, 139
Manifold gauges
installing, 221–24
removing, 235
Math for HVAC/R, practical, 16–21
Matter defined, 70–71
Mechanical clearance, 120
Mechanical switches, 51–52
Megohmmeter, 40–41
Mercury bulb thermostat, 52–53, 355
Meter Miser (Frigidaire), 194
Metering
Meters for refrigeration and air conditioning, 36
Methyl chloride
Methyl fluoride (R-61L), 88
Milliamperes
Installation of, 184
Open display case, 371–72
Open end wrenches, 8
O
Ohm defined, 30–31
Ohm’s Law, 45
Ohmmeter, 38–39
Oil pressure safety switches, 386–88
Oil separators, 181, 183
installation of, 184
Ozone
defined, 200
defined, 200
in lower atmosphere, 201
Ozone depletion, effects of, 200
Ozone layer
altitude of, 201
skin cancer resulting from depletion of, 200

P
Packaged air conditioning system, 288–90
Parallel circuit, 32
Percentages, 19
Permanently split capacitor (PSC) motors, 61–62
Phos/copper (sil-phos) brazing alloys, 105
Phosgene gas, 94
Photoelectric cell to produce electricity, 29
Piezoelectricity, 29
Pilot assemblies in gas furnaces, 317–18
Pin punch, 13
Pipe wrenches, 10
Piping
defined, 97
refrigerant, commercial, 399–402
Pistons of a compressor, 114–15
Planetary electrons, 25
Plate condenser, 195
Plate evaporators, 152–53
Pliers, 12
Poles
added to the stator winding to start a motor, 59
of contact points, 55
repelling of like, 58
Poly-phase motors, 63–65
Poppet valve, 117–18
Potential energy, 72
Potential relay, 56
Pounds per square inch absolute (PSIA), 81
Pressure charging chart, 419–20
Pressure defined, 80–81
Pressure drop method of airflow measurement, 346–47
R
Radiation defined, 76
Ratios, 19
Reach-in display case, 372
Refrigerant cylinders, 89
Refrigerant recovery, 91–92, 200–212
basic, 206–7
defined, 202
hazards for, 208
incineration and, 203
liquid method for, 206–8
off-site, 203–4
procedures for, 206–8
reuse and, 203
vapor and liquid methods for, 206
vapor method for, 206, 208
Refrigerant recovery-recycle units
on-site, 203–4
requirements for, 206
selecting, 207–8
Refrigerant tubing, precharged, 298–300
Refrigerant weight, charging a system by, 420
Refrigerant-123, 202
Refrigerant-124, 202
Refrigerant-125, 202
Refrigerant-134A, 202
Refrigerant-500, 88
Refrigerant-502, 88, 201
Refrigerants, 85-86
absorbing and rejecting heat, 79
defined, 79-80
leakage of, 242
metering devices to regulate flow of, 157-78
properties of, 86-87
replacement, 89-90, 202, 209-10
safety rules for handling, 4-5, 93-94
three R’s of, 91
types of, 87-89
velocity of, for evaporators, 150
Refrigeration, 69-263
defined, 70
introduction to, 70-84
Refrigeration system
accessories for, 179-92
capacity, 249
domestic, 265-85
motors for, 36
moisture contamination in, 181
safety precautions for working on, 4-5, 93-94, 235-36
Refrigerators and freezers, 266-72
dehydration, 221
classical components of, 267-70
noisy operation of, 220
plate evaporators in, 152
Registrar of Contractors, 431-32
Regulating and licensing agencies for HVAC/R businesses
local, 432
national, 430-31
state, 431-32
Relative humidity, 151, 308-10
Relative temperature, 73
Relays, 55-56. See also individual types
Remainder defined, 17
Remote bulb thermostat, 355-57
Reset-type safety controls, 329
Residential cooling systems, 288-313
base for, 295-96
checking the tubing for, 300
components of, 290-94
connecting the condensing unit to the evaporator in, 297-99
electrical connections for, 296
evaporator airflow requirements for, 294-95
failure to cool in, 304
installation of, 295-301
preseason starting and checking procedures for, 290-302
starting, 301-3
troubleshooting, 302-5
types of, 288-90
Resistance, 30-31
of capillary tube, 159
Reverse cycle refrigeration system, 407, 409
See also Heat pumps
Reversing valve, 342
Ring valve, 118
Room air conditioners, 273-85
components of, 277-79
cooling and heating capacity of, 275
energy efficiency ratio (EER) or seasonal energy efficiency ratio (SEER) of, 276-77
features of, 273-77
installation of, 279, 281
troubleshooting, 281-83
typical wiring for, 280
voltage requirements of, 275-76
Rotary compressors, 121-22
Rotary switches in room air conditioner, 278
Rotating blade rotary compressor, 122, 124
Rotors, 58-59
Round (rat-tail) files, 12
Run capacitors, 56-57
S
Safety rules and procedures
general, 2-7
for hammers, 11-12
for recovery cylinders, 205-6
for screwdrivers, 10
for wrenches, 10
Schrader valves, 214
as means to access sealed system, 223
protection for installing gauges on, 223-24
Screw compressors, 122-24
Screwdrivers, 10
Scroll compressors, 125-28
advantages of, 126
compared to piston compressors, 126-28
operation of, 125
Sealed systems, 193-99. See also Hermetic system
accessing, 213-19
adding oil to, 236-37
air in, checking for, 244
backseating and breaking a service valve on, 221-24
charging refrigerant in, 240-41
diagnosing, troubleshooting, and servicing problems in, 218-21
domestic, 193-94
evacuating, 229-31
leak testing in, 233-35, 238-39
liquid charging, 224-27
moisture in, 236
motor burnout in, 237-38
parts of, 194-98
pressures in, 218-19
pumping down, 227-28
removing manifold gauges on, 235
safety procedures for repairing, 232-33
testing and charging the oil level of, 232-33
testing compressor efficiency of, 231-32
vacuuming, 228-29
vapor charging, 224
Seasonal energy efficiency ratio (SEER), 276-77
Secondary heat exchanger, 323-24
Semiconductor atom, 27
Sensible heat, 77
Sequencers, 58, 329-30
Series circuit, 32
Series-parallel circuit, 32-34
Service valve wrench, 9
Shaded pole motors, 60-61
Shell and coil condenser, 135
Shell and tube condenser, 135-36
Sight glass
for checking refrigerant charge of commercial equipment, 417-18
for the liquid line, 180-81
Silver solder, 105
Slant or sloped coil, 292
Sling psychrometer, 305-6, 309
Slip in motor speed, 59-60
Snap action thermostat, 52
Soap bubbles for leak detection, 234
Soft tubing, 98
Soft-faced hammer, 11
Software for HVAC/R business
commercial load estimating, 434
duct sizing, 434-35
electronic filing, 437
equipment cost analysis, 436
food preparation systems, 435-36
gas venting calculation, 435
industrial ventilation, 435
inventory control, 437
psychrometric chart, 436
residential load estimating, 434
service call scheduling, 436
Soldered fittings, 98
Soldering safety rules for, 5, 109-10
techniques for, 107-9
Soldering alloys, 104-5
Solenoid valves, 184-88
four-way (reversing), 186
purpose of, 184-85
selecting and installing, 186-87
three-way, 186
troubleshooting, 188
two-way (diverting), 185-86
Solid-state method to control heat pump
defrosting cycles, 341
Solid-state thermostat, 357
Spark ignition system for gas furnaces, 318
Specific heat value, 77-79
Specific volume of a refrigerant, 86-87
Speed of a motor, calculating, 60
Split phase or single-phase motors, 62-63
Split system for residential air conditioning, 290
Spray headers, 139-40
Spuds to control gas flow to burner, 316-17
Start capacitors, 56-57
Static electricity, 27-28
Stationary blade rotary compressor, 121-22
Stator winding, 59
in three-phase motors, 63-64
Step down transformer, 57
Subtraction of whole numbers, 17
Subtrahend defined, 17
Suction line accumulator, 341, 398-99
Suction line filters, 190
Suction line for commercial refrigeration systems, 401-2
Sulfur dioxide (R-764), 88
Sum defined, 17
Supplemental heat, 344-45
Surge tanks, 385
Swaging tubing, 99-100
Switches defined, 50
Temperature, 72–76
  dry bulb and wet bulb, 305–10
  relative, 73
Temperature charging charts, 419–20
Temperature difference (TD)
  between air entering evaporator and refrigerant's saturation temperature, 150–51
  operating, determining, 389–90
Temperature difference method to adjust the low-pressure control of commercial refrigeration systems, 389
Temperature measuring devices, 74–75
Three-phase (poly-phase) motors, 63–65
Thermostats, 72–74
Thermoelectricity, 29
Thermodynamic laws, 79–81, 323
Thermoelectricity, 29
Thermocouple, 318
Thermistor in electronic thermometer, 75
Thermo valve troubleshooting-service hints, 354–58
Thermobank, 404–5
Thermocouple, 318
Thermodynamic laws, 79–81, 323
Thermoelectricity, 29
Thermostats, 249–63. See also individual types
  altitude adjustment for, 253
  control contacts on, 251–52
  control differential for, 252
  in cooling and/or heating system, 354–61
  defined, 249
  diagnosing problems for, 253–54
  in electric furnace, 332–33
  emergency heat setting on, 345
  in gas furnace, 321
  installing, 361
  as multi-function device, 354
  range adjustment of, 252–53
  replacing, 254–55
  in room air conditioner, 278–79
  subbase for, 359
  types of, 355–59
Thermostatic expansion valves (TEV or TXV), 162–75
  adjustment of, 172
  body temperature of, 169–70
  external equalization for, 167–69
  location and installation of, 169–72
  as metering devices in air conditioning systems, 293–94
  parts of, 162–63
  popularity of, 162
  troubleshooting—service hints for, 173–75
  types of, 164–66
Thermostatic motor controls, 249
  purpose of, 253
Three-phase (poly-phase) motors, 63–65
Time and temperature method to control heat pump defrosting cycles, 341
Time delay relays, 57–58
Time delay system in electric furnaces, 330–31
Time initiated, pressure terminated method of defrosting, 412
Time initiated, temperature terminated method of defrosting, 410, 412
Time initiated, time terminated method of defrosting, 410
Timers, 58
Tin-antimony solders, 105
Tin-lead solders, 105
Top dead center (TDC) of piston, 113
Torch
  operating procedures for, 106–7
  safety rules for working with, 5
