Carpentry and Joinery for Advanced Craft Students: Site Practice

Peter Brett
Brooklyn College, Birmingham

Stanley Thornes (Publishers) Ltd
Contents

Preface .................................................. 7
Acknowledgements ...................................... 8

chapter 1
Sources of technical information ......................... 9
Building Regulations – British Standards Institution – Building Research Establishment – Research, manufacturers and trade development associations – Other information sources – Self-assessment questions

chapter 2
Building control ......................................... 14
Planning permission – Building Regulations approval – Health and safety controls – Self-assessment questions

chapter 3
Building administration .................................. 35

chapter 4
Applied calculations ...................................... 63
Units of measurement – Basic processes – Electronic calculators – Formulae – Areas and perimeters – Volumes – Pythagoras’s Theorem – Intersecting chords’ rule – Problem solving – Self-assessment questions

chapter 5
Timber technology and design ......................... 77

chapter 6
Principles of insulation
Fire-resistant construction – Thermal insulation – Sound insulation – Self-assessment questions

chapter 7
Geometry
Plane geometric figures – Geometric solids – Practical examples – Self-assessment questions

chapter 8
Site measurement
Building survey – Site setting out – Site levelling: recording readings – Self-assessment questions

chapter 9
Machine utilization
Power supply – Site woodworking machines – Portable powered hand tools – Health hazards associated with wood dust – Self-assessment questions

chapter 10
Construction work

chapter 11
Temporary construction work
Arch centres – Shoring – Formwork – Self-assessment questions

A guide to advanced examinations and study
