MODERN PRACTICAL MASONRY

Edmund George Warland

With an introduction by Christopher Weeks
MODERN PRACTICAL MASONRY

A COMPREHENSIVE TREATISE ON
THE PRACTICE OF THE VARIOUS
BRANCHES OF THE CRAFT
GENERAL, MONUMENTAL, MARBLE, AND GRANITE

FOR THE USE OF
CRAFTSMEN, STUDENTS, TEACHERS, BUILDERS, & ARCHITECTS

CONTAINING A FULL DESCRIPTION OF
TOOLS AND MACHINES; DETAILS AND CONSTRUCTION; HOISTING
AND SETTING OF STONWORK; PRINCIPLES OF STONE CUTTING;
BUILDING STONES AND THEIR CLASSIFICATION; PRESERVATION OF
STONE; GEOMETRY AND SETTING OUT; COSTING AND ESTIMATING

WITH A FULL GLOSSARY AND INDEX

BY

E. G. WARLAND, A.I.Struct.E.
Chief Lecturer on Masonry and Geometry for Masons, L.C.C. School of Building,
Brixton, London, S.W.

With upwards of 600 Illustrations and 18 double-page Plates from
Drawings by the Author and 59 Reproductions from Photographs

LONDON
B. T. BATSFORD LTD., 94 HIGH HOLBORN
CONTENTS

CHAPTER                                      PAGE

Dedication                                      1
Foreword, by F. E. Drury                         1
Preface                                         2
Introduction                                    2
Abbreviations                                  2

SECTION I.—CONSTRUCTIONAL AND PRACTICAL
MASONRY

I. DESCRIPTION OF TOOLS                           1

The Axe—The Patent Axe—Batting Tool—Bevel or Shiftstock—Wood-
handled Chisels—Gouge—Mallet-headed Chisels—Drafting Chisel—Boasters—
Claw Chisels—Gouges—Points—Waster—Fillet and Moulding Chisels—
Hammer-headed Tools—Hammer-headed Punch—Pitching Tools—Cup-headed
Chisel—Marble Tools—Fauld's Patent Tools—Steel Wing-compasses—Centre
Bob—Cock's Combs—Dummy—Drags—Braces and Archimedean Drills—
Flat Bits—Iron Hammers—Spall Hammer—Jumpers—The Diamond Jumper
—Flat Jumper—Lewising Tools—Masons' Spirit Level—Boxwood Fourfold
Fillet Saws—Grub Saw—French Scraper—Steel Set-squares—Sinking-square—
Double Stock Square—Straightedge—Trammel and Scriber—Box Trammel—
Fixers' Bedding Trowel.

II. DESCRIPTION OF MACHINES IN USE                10

Frame Saws—Diamond Saws—Duplex Saws—Twin-blade or Duplex Saws—
Cross-cut Diamond Saw—Carborundum Saws—Planing and Moulding
Machines—Rubbing Beds—Polishing Machines—Stone Turning.

III. DETAILS AND CONSTRUCTION                     16

Foundations—Footings—Depth of Concrete—Width of Footings—Stone
Footings and Walls—Stone-faced Walls—Damp-proof Courses—Construction
of Piers—Stone Columns—Rubble Walls—Surface Finishings—Masonry
Joints—Masonry Mitres—Ashlar Stops—Moulding Stops—Details for Window
Openings—Window Jambs—Treatment of Stoolings—Construction of Lintols
and Arches—Heads or Lintols supported by R.S.J.'s—Stone Lintol with Secret
Keyed Joints—Construction of Flat Arches—Construction of Pediments—
Construction of Fascia Courses—Marble Wall Linings—Details of Marble
Chimney-piece—Sofit Courses—Details for Gable—Details for Buttresses—
Arches, Technical Terms and Descriptions—Construction of Oriel Windows—
Tracery—Entablatures—Construction of Cornices—Coverings to Cornices—
Details of Masonry Doorway—Construction of Stone Domes and Vaults—
Construction of Stone Stairs.
CONTENTS

CHAPTER IV. HOISTING AND SETTING OF STONEWORK .......................... 69
Scaffolding—Hoisting—Appliances for Lifting—Centering—Mortars—Limes and Cements.

I. MASONRY COSTING AND ESTIMATING .... 233

GLOSSARY .......... 263

INDEX .......... 271
INDEX

A

Abstracting, definition of, 245

Portland stone doorway, 253

Abutments, definition of, 46

Alabaster, composition of, 126

Ancaster stone, chemical composition and physical properties, 120

Anderson’s canting arm planer, Fig. 61

diamond blade, 12; Fig. 58

duplex saw, 11; Fig. 56

four-head planing machine, 14; Fig. 63

Jenny Lind polisher, Fig. 66

openside planer, Fig. 64

rubbing bed, Fig. 65

g simplex cross-cut saw, 12; Fig. 57

Angle drafts, working of, 92

of skew, 190

Anston stone, chemical composition and physical properties, 124

Apex stone for gable, 45; Fig. 154

for pediment, 37, 186, 187, 188, 189; Figs. 433, 440

Appliances for lifting, 72

Aqueous rocks, classification of, 115, 116

Arch, approximate semi-elliptical, 47

approximate, semi-elliptical, setting out of, 143, 144; Figs. 342, 343

classification of, 47

curves, setting out of, 140

definition of, 46

five-centred, setting out of, 143, 144; Fig. 343

flat, details and construction of, 37; Fig. 123

flat, in cylindrical wall, setting out of, 193, 194, 195; Figs. 460-467

Gothic, or pointed, 47; Figs. 163-165

and lintol, 32; Figs. 117, 118

of large span, calculation for plotting curve, 145-147; Figs. 347, 348

calculation when span and radius are given, 145, 146; Fig. 347

Arch of large span, calculation when span and rise are given, 145

rampant, 47, 63; Fig. 167

setting out of, 145, 146; Fig. 346

segmental, 47; Fig. 162

setting out of, 140, 142, 143; Fig. 341

semicircular, 47; Fig. 160

setting out of, 140, 142; Fig. 340

semi-elliptical, 47; Fig. 161

setting out of, 140, 141; Fig. 339

shouldered, 48; Fig. 168

squinch, definition of, 60

stones or voussoirs, 46, 89, 90, 91; Figs. 249-251

technical terms, 46, 47

Archivolt, definition of, 47

Argillaceous cements, defects of, 116

Arris, definition of, 24

Ashlar, chisel-drafted margin, 24; Figs. 85, 92

definition of, 24

plain, definition of, 24

punched or broached, 24; Fig. 86

rusticated, forms of, 26; Figs. 91-94

stop, description of, 30, 31; Fig. 106

Asphalt covering to cornices, 58; Figs. 184, 190

Auxiliary elevation, 190

rules relating to, 155

156; Figs. 360, 361

plan, rules relating to, 156, 161; Figs. 375, 376

projection, definition of, 156

Axe, 1; Fig. 1

patent, 1; Fig. 2

Axed, fine, 1

medium, 1

Axial and normal sections of helical solids, 184, 185; Figs. 429, 430

pitch of helix, definition of, 182
Back, clean, defined, 24
Baluster, die-stone, definition of, 53
Banker work, costing, 238
Bar tracery, formation of, 51
Balustrades, composition of, 53
Baths, 121
Bed joints for arch stones, 47
Beer stone, physical properties, 121, 122
Bevels for intersecting surfaces, 172; Figs. 401, 402
for marble linings, 173; Figs. 403, 408
method of obtaining, 178
or shiftstock, 2; Fig. 4
testing of, 2
Bill of quantities, preparation of, 245
Billing, definition of, 245
Portland stone doorway, 254
Bird's-mouth mitre joint, 30, 31; Fig. 108
Bituminous paint, use of, 55
Bolsover Moor stone, physical properties, 124
Bolts and plates in cornice, 55
lewis, in cornice, 55
rag, in cornice, 55
rag, where employed, 39
tailing down cornices, 54; Fig. 182
Bond, Francis, "Gothic Architecture in England," 68
Boning blocks, use of, 83; Fig. 236
line marked on mould, 84; Fig. 241
line marking on stone, 84
process of, 82
the line, sketch of, 82; Fig. 234
the marginal drafts, sketch of, 82; Fig. 235
Boxground microphoto, Figs. 303, 304
Bramley Fall stone, composition and physical properties, 117
Breaks, their construction and bonding, 19; Fig. 70
Bricks, standard measurements, 19
Brickwork, pressure on, 17
Bristol Blue Pennant stone, composition and physical properties, 117
"Building Educator," R. Greenhalgh, 68
Building stones, Section I., Chapter VI., 112-130
choice of, 127
durability of, 126, 127
Buttresses, construction of, 45; Fig. 151
plan of, Fig. 156
Calcareous cements, composition of, 116
sandstones, definition of, 117
stones, description of, 119
Calculations for arch curves when span and radius are given, 145, 146; Fig. 347
for arch curves when span and rise are given, 145
for plotting curves, 145, 146; Fig. 347
Capping as a form of coping, 53
Carborundum, allocation of horse power, 242
fitted blades, method of making, 13
fitted blades, relative cutting speed, 12
fitted blades, use of, 13
Cements, argillaceous defects of, 116
calcareous, composition of, 116
ferruginous, consisting of, 116
siliceous, how formed, 116
Centering, use of, 74
for domes, 75; Figs. 226, 227, 228
for fascia courses and architraves, 75, 76; Figs. 229, 230
for Gothic arches, 75
for groined ceiling, 75
for large arch, Figs. 225, 227
for section through rib, Fig. 226
for semi-elliptical arch, 74, 75; Fig. 224
for stone dome, Fig. 228
for vaulting, 75
Centre bob, uses of, 4; Fig. 23
Centres for arches, 74, 75; Figs. 224, 225
Chain dogs, 72
sketch of, 73; Fig. 222
lewis, sketch of, 73; Fig. 221
tackle, endless, 74
Chains, skip, description of, 72
sling, for lifting, 74
Chamfers, testing of, 2
Characteristics of limestones, 120
Chilmark stone, chemical composition and physical properties, 122
INDEX

Chisels, boasters, use of, 2; Fig. 9
  claw, use of, 2; Fig. 10
  cup-headed, use of, 4; Fig. 20
  drafting, use of, 2; Fig. 8
  hammer-headed, use of, 4; Fig. 16
  driver, use of, 2; Fig. 6
  fillet and moulding, use of, 4; Fig. 15
  gouges, use of, 2; Figs. 7, 11
  mallet-headed, use of, 2
  waster, use of, 4; Fig. 14
  wood-handled, use of, 2

Circle as section of a cone, 162
  as section of a cylinder, 160
  in contact, 132; Fig. 312
  inscribed, 134, 135; Figs. 315, 316
  properties of, 131; Figs. 305, 306
  tangents to, 131; Figs. 309, 310, 311

Circular mouldings, working of, 87; Fig. 244

Classification of rocks, 112

Claw tooling a surface, 84; Fig. 238

Clipsham stone, chemical composition and physical properties, 122

Closers for pediment, 37

Cock's combs, uses of, 6; Fig. 24

Column and entablature of Tuscan Order, 52; Figs. 172, 173
  being fixed, 23; Fig. 76
  granite bedding of, 23
  in conjunction with steelwork, Fig. 75
  setting out of entasis, 148, 150, 151; Figs. 353, 354
  stone, bedding of, 23
  stone, method of working by hand, 92, 93; Figs. 256-258

Compasses, steel wing, uses of, 4; Fig. 22

Conchoid of Nicomedes, 148

Concrete, depth of, 17
  lintol, where used, 32

Cone, development of surface, 163, 164; Figs. 379-383
  the sections of, 162, 163; Figs. 379-382

Conical zones, in development of sphere, 164, 165; Fig. 387

Constituents of granite, 113

Construction at quoin of building, 21; Fig. 72
  of buttress, Figs. 151-159
  of centering for large arch, Fig. 225
  of cornice, 56; Figs. 183-188

Construction of domes and vaults, 60; Figs. 200, 201
  of entablature, Figs. 176-179
  of flat arch, 37, 38; Figs. 123-125
  of gable, Figs. 151-155
  of marble fascia course, 40; 41; Figs. 128-130
  of modillion cornice, 57; Figs. 189, 190
  of oriel, 50, 51; Figs. 170-173
  of piers, 22; Figs. 73, 74, 147
  of soffit courses, 43, 44, 45; Figs. 140-142, 145-148
  of stone-faced walls, 18; Figs. 68-71
  of stone fascia course, 40; Figs. 126, 127
  of stone head or lintol, 35; Figs. 117, 118

Coping for gable, 45
  functions of, 58
  names of sections, 60
  or splitting stone, 79, 80; Fig. 231
  segmental, 27; Fig. 97

Corbel, definition of, 47

Corbelling at splayed angle of building, setting out of, 199-201; Figs. 479-489

Cornice, construction of, 53; Fig. 181
  covering to, 58
  detail of, 53; Fig. 180
  finished, showing detail, Fig. 188
  function of, 53
  photographs showing construction, Figs. 185-187
  section of, 56; Fig. 183
  sketch showing construction, Fig. 184
  tailing down of, 54; Fig. 182
  to work a break, 88
  working by hand, 86; Fig. 243
  working return end, 87; Fig. 245

Corona and cymatium of cornice, 55

Corsehill stone, chemical composition and physical properties, 117

Corsham Down stone, physical properties, 121

Cost sheet No. 1, frame-sawing; 236
  No. 2, diamond or carborundum sawing, 237

Costing and estimating, Section III., 233-261
  object of, 233

Course, blocking, 54
Course, fascia, description and construction of, 37, 40; Fig. 126
   section through, 40; Fig. 127
   lacing, 45
   modillion, support of, 55; Figs. 189, 190
   plinth, 19; Fig. 70
   soffit, an alternative method of construction, 43; Fig. 142
   method of jointing and securing, 41; Fig. 140
   section of, 43; Fig. 141
   suspended from reinforced concrete lintel, 41, 44; Fig. 145
   string, 46
Coursing and heading spirals, projection of, 230; Fig. 601
Cover mould, application of, 109
   projection of, 218; Fig. 552
Coverings to cornices, description of, 58
Cramp, metal, in domes, 62
   made of, 28
   uses of, 20, 30; Fig. 103
   pin for marble linings, 39; Fig. 129
   slate, where used and method of fixing, 28; Fig. 104
Cramped joints, description of, 28
Crane, allocation of horse power, 242
   apportionment of oncosts, 243
Cuneoid approximate development of surface, 193; Figs. 455, 456
Current bedding planes, 129
Cusps, formation of, 51
Cut string at end of steps, 65
Cylinder, development of surface, 160, 161; Fig. 377
   section of, 160, 161; Figs. 377, 378

D

Damp-proof course, suitable material for, 19
   uses and position of, 19
Darley Dale stone, chemical composition and physical properties, 118
   microphoto, Figs. 303, 304
De la Rue, J. B., 232
Dentils, definition of, 53
Details and construction, Section I., Chapter III., 16-67

Details and construction of flat arch, 37:
   Fig. 118
   at end of sills, 32; Figs. 112, 113
   for gable, elevation of, Fig. 151
   side elevation of, Fig. 152
   for window opening, construction of, 30; Fig. 110
   of lewis bolt, 43; Fig. 143
   of metal plate and bolt, 43; Fig. 144
   of pin cramp, 40; Fig. 129
   through sill, 46; Fig. 157
Development and section of solids, 158, 160
   definition of, 160
   of conical soffit, 213; Fig. 530
   of cuneoidal surfaces, 193; Figs. 455, 456
   of helicoidal surfaces, 185, 186, 192, 193, 198; Figs. 432, 453, 454, 476
   of helix, 182, 185; Fig. 428
   of sphere, 164, 165; Figs. 385-388
   of surface of cone, 163, 164; Fig. 383
   of surface of cylinder, 160, 161; Fig. 377
   of surface of semicircular vault, intersected by a conical vault, 163, 164; Fig. 384
Diamond-fitted blades, use of, 12
   saw, allocation of horse power, 242
   sockets, U-type, 12
Diaper flint walling, 24; Fig. 82
Dihedral angle, determination of, 169
Dog-legged stair, 65, 66; Figs. 209, 210
Dogs, chain, for lifting, 72
   sketch of, 73; Fig. 222
Dolomitic limestones, classification of, 124
Dome, construction of, 60
   fixing of, 61
   hemispherical, metal ties in, 61
   interpenetration of, method of working stone for, 104, 107, 108, 109; Figs. 294-298
   pendentive, definition of, 60
   method of working stone for, 100, 102, 103; Figs. 282-285
   polygonal, the construction of, 61
   setting out of, 204; Figs. 497, 498
   stone for first course, method of working, 98, 99; Figs. 273, 276
INDEX

Dome stone, method of working from a prism, 100-102; Figs. 277-281

Dowel joints, 26, 27; Fig. 96

Dowel joints, setting out by rectangular block method, 204-206; Figs. 499-502

Dousting stone, chemical composition and physical properties, 122

Dowelled joints, 26, 27; Fig. 96

Dowels, brass, in marble work, 28

Drags, kind of, 6; Fig. 26

Drills, Archimedean, 6; Fig. 27

Drill course, 46

Drury, F. E., "Geometry of Building Construction," 232

Dummy, use of, 6; Fig. 25

Ellipse, as a plain curve, 138

as section of a cone, 162, 163; Figs. 379-382

as section of a cylinder, 160, 161; Figs. 377, 378

as the projection of a circle, 138, 141; Fig. 336

method of drawing curve by trammel, 138, 141

tangents and normals to, 138, 141; Figs. 337, 338

Elsden, J. M., "Applied Geology," 130

English granites, list of, 115

Entabature, its division and definition, 52

modern construction and fixing, 52; Figs. 176-179

of the Doric Order, 52; Fig. 175

of the Tuscan Order, 52; Fig. 174

Entasis of columns, 148

Equipment of masonry works, 234

Estimate of Portland doorway, 245; Figs. 191-194

of Portland doorway, abstract, 253

of Portland doorway, billing, 254

of Portland doorway, observations, 254-255

of Portland doorway, taking off, 246-252

of Portland doorway, total, 254

Estimate for marble lining for bathroom walls, 256, 257, 258

for marble lining to conical window head, 260, 261

outline of, 243

Extrados, definition of, 46

Face, return, 24

term applied to, 24

Fascia, definition of term, 37

marble over shop front, method of securing, 39; Figs. 128, 130

Feathers, where used, 81

Felspar, composition of, 131

Felspathic sandstone, 116

Ferruginous cements, consisting of, 116

sandstone, 116

Filling-in stones, 55

Five-centred arch, setting out of, 143, 144; Fig. 343

Fixing overhand, 70

Flat arch in cylindrical wall, setting out of, 193-195; Figs. 460-467

Fliers, in stairs, 63

Flight of steps, 63

Flutings, working of, 92

Foils, situation of, 51

Foliation, formation of, 51

Footings for piers, 20

method of forming, 17

width of, 18, 19; Fig. 69

Forest of Dean stone, chemical composition and physical properties, 118

Foundation bed, its qualities, 17

calculation of area, 20

for piers, 20

for towers, 20

pressure on, 17

their importance, 17

Frame saws, use of, 10, 235; Fig. 54

Gads, description of, 80

Geometrical construction of mouldings, 139; Figs. 323, 334

Geometry of masonry, Section II., Chapter I., 131-152
