Although great care has been taken with the writing and production of this volume, neither The Nautical Institute nor the authors can accept any responsibility for errors, omissions or their consequences.

This book has been prepared to address the subject of tug use offshore, in bays and rivers. This should not, however, be taken to mean that this document deals comprehensively with all of the concerns which will need to be addressed or even, where a particular matter is addressed, that this document sets out the only definitive view for all situations.

The opinions expressed are those of the authors only and are not necessarily to be taken as the policies or views of any organisation with which they have any connection.

## Foreword

by Rear Admiral D. G. Ramsey MNI USN (Ret'd)  
Director of Marine Safety International ..... vii

## Introduction 1

by Mr. C.J. Parker BSc OBE FNI  
Secretary, The Nautical Institute, 1973—2003 ..... viii

## Introduction 2

by the authors ..... ix

## Chapter

page

1	<b>Boat handling</b> .....	1
	The future of training; job requirements; "walking" the tug; undocking a twin screw tug; docking a twin screw tug; float docks; going alongside a moving tug or ship; maneuvering the tug near barges and docks.	
2	<b>Towing equipment</b> .....	9
	Towing winches; chain gear; catenary; maintenance of wire and gear; hydraulic tow pins; chafing boards towing arches.	
3	<b>Ocean towing</b> .....	17
	Tow wire catenary; double wire towing; weather; traffic/VTS separation schemes; weather routing; winter towing; towing/turning in extreme weather; recovery of a barge at sea; retrieval gear; dynamic movement at sea; watertight integrity and stability; offshore moorings.	
4	<b>Towing and maneuvering barges in harbors, bays and rivers</b> .....	39
	General comments; towing ocean barge in harbors and rivers; controlling the barge on a short wire; making up to the barge; streaming tow; pushing the barge; docking; moving from alongside; undocking; fair tide departure; shifting at a finger dock; giving over to harbor tug; docking/undocking 'on the wire'; anchoring in a harbor or river; transiting narrow bridges; bar crossings.	
5	<b>Towing close astern</b> .....	71
	Canadian, North American and European approaches.	
6	<b>Multiple barge towing</b> .....	85
	Single drum winch with under-rider'; setting up tow; getting underway/departure; outbound bar crossings; arrival/breaking tow; breaking tandem tows; double drum towing.	
7	<b>Special tows and disabled ships</b> .....	94
	Towing disabled ships; examples of special tows.	
8	<b>Flat towing / dead ship movement</b> .....	100
	Conventional tugs and flat tows; proper line usage; power tug placement; assist tug placement; shifting with various tug types.	
9	<b>Pivot point</b> .....	109
10	<b>Watch standing priorities when towing</b> .....	113
	Radar; ARPA, ECDIS and AIS; fathometer; collision avoidance practices; moving in restricted visibility.	
11	<b>Command</b> .....	120
	Situational awareness; multi-tasking; spatial orientation/judgement; consistency; crew management; aptitude; ego; critical thinking; mentally aggressive/operationally careful; patience; blunt self-assessment; control; positive attitude/confidence; competency; imagination; master/pilot relationship; the role of the Designated Examiner.	
12	<b>Conclusion</b> .....	125

<b>Appendices</b>	<b>page</b>
A USCG certification requirements — the new towing license .....	127
B Training syllabus for Mates of Towing Vessels .....	130
C Training syllabus for Masters of Towing Vessels .....	133
D Dynamic movement at sea (extract from the <i>US Navy Towing Manual</i> ) .....	139
E Report of the USCG Bridge Allision Study .....	144
F Assessor's Manual for conducting mariner assessments .....	151
<b>Bibliography</b> .....	<b>159</b>
<b>Index</b> .....	<b>161</b>
<b>European Tug designations</b> .....	<b>170</b>

### ACKNOWLEDGEMENTS

A book such as this cannot be written without us absorbing the knowledge, wisdom and expertise of those who have worked in the offshore towage industry. This sector continues to evolve and there are many individuals we would like to thank for their active participation in this project. There are also many colleagues and shipmates who have coloured our understanding of best practice and so we would like to acknowledge our respect for the conscientious hardworking tug boat professionals around the world past and present

From the towing companies we have had the most thoughtful support and advice. We would like to thank the following for the help they have given us. From Sause Brothers Ocean Towing , Mr Dale Sause, Mr Dick Laur, Mr Mark Babcock, Mrs Julie Woodman and Captains Charlie May, Rusty Green, Odd Engeseth, Lynn Wenker, Butch Shanklin, and Gary Rickey

From Fosse Maritime we had assistance from Mr Mike Scalley and Captains Larry Johnson Doug Pearson and Jim Fox. The support of Crowley Maritime was very much appreciated from, Mr Mark Miller, Mr John Ara and Captains Igor Loch, James Macualey, Howard Clark, Jim Penny, Bruce Fox and Captain Toliver.

From Moran Towing we had the support of Mr Bruce Richard; from Penn Maritime Mr Jim Sweeney and Mr Charlie Rose; from K-Sea Transportation ,Mr Bob Matson, and Mr Richard Pittner and from Conoco Phillips Mrs Linda (Jacobson) Viens

From Seapan, Captain Don Larson and Captain Don Westmoreland. From Smit Marine Canada Captain Don Rose.

Individuals who have added their expertise include Mr Luke Harden from The National Maritime Centre, Mr Martin Kappert, American Maritime Cases and Captain Dan Washburn, Captain Al Anderso, Captain Steve Woods (Columbia river Pilot), Mr David Sears, Attorneys Mr John Meadows and Mr John Lenker, also Captain Peter Dunderdale who wrote *Towing in Ice Covered Waters* and Captain Henk Hensen author of *Tug Use in Port* who kindly reviewed our work

Special mention of those who have helped in the production of the book include Captain Malcolm Mc Duggal and Mr George Lang from The Simulator Centre Warsash UK, Captain Brad Dunn of Chevron Shipping and his wife Tamara.

Captain Jeff Hill of Sause Brothers kindly read our manuscripts and lead us forward. Special thanks to Sergio Lizarraga who designed most of the excellent diagrams and illustrations and Tony Hepworth who compiled the overall layout and index. Finally we are grateful to Rear Admiral David Ramsey for writing the foreword.

# INDEX

**A**

- abating weather ..... 22
- abrasions ..... 14
- absorbing dynamic loads ..... 11
- academy graduates ..... 2
- accumulated ice ..... 24
- active vessel traffic management ..... 150
- additional bridge lighting ..... 148
- additional fendering systems ..... 1, 48
- Admiralty briefs ..... 33
- advanced towing skill ..... 73
- adverse cross winds ..... 112
- after
  - barge ..... 91
  - deck tank vents ..... 34
- aids to navigation ..... 148
- AIMS ..... 95
- air actuated dog clutch ..... 9
- air draft ..... 101
- AIS ..... 43
- Alameda ..... 60
- Alaska ..... 30
- Alex L. Parks ..... 113
- Almon Johnson ..... 9
- American
  - Bureau of Shipping ..... 10
  - Maritime Cases ..... 60
  - Waterways Operators ..... 1
- Amoco Cadiz ..... 94, 95
- anchored barge ..... 57
- anchoring ..... 56
  - an ocean barge in a harbor or river ..... 55
- anticipation ..... 120
  - of the unexpected ..... 101
- Antonio Ferraz ..... 36, 37, 69
- appropriate speed ..... 25
- approved simulator course ..... 146
- aptitude ..... 121
- Archimedes Principle ..... 33, 35
- Arkansas River ..... 144
- ARPA ..... 113, 116
- arrival / breaking tow ..... 91
- assist tug ..... 39, 48, 49, 58, 88, 99, 101
  - placement on flat tows ..... 103
- Astoria ..... 60, 68
  - pilot station ..... 61
- Atlantic ..... 23
- automatic tension control ..... 9
- AWO ..... 144
  - Board of Directors ..... 149
  - Responsible Carrier Program (RCP) ..... 149
- azimuthing
  - drives ..... 4
  - stern drive (ASD) tugs ..... 104

**B**

- backing ..... 74
  - against the bow of a barge ..... 74
  - spring line ..... 88
  - the tug ..... 44
- back up hold down ..... 27

- ballasted, bulbous bowed VLCC ..... 95
- ballast tanks ..... 33
- bar
  - channel ..... 65
  - conditions ..... 63, 64, 90
  - crossings ..... 62, 65
- barge
  - control ..... 45
  - empty ..... 49
  - flat tow ..... 100
  - fully loaded ..... 49
  - handling ..... 39, 125
  - handling characteristics ..... 49
  - partially load ..... 49
  - skegs ..... 49
  - stern notch ..... 51, 58
- barometer ..... 21
- barometric
  - pressure ..... 23
  - pressure gradients ..... 20
- bar
  - ports ..... 62, 64
  - report ..... 63, 68
- Barrow Point ..... 98
- Baton Rouge ..... 149
- Bayou Canot ..... 146
- beam-ends ..... 34
- beam sea ..... 65
- beam to length ratio ..... 5
- beam width ..... 114
- Bering Sea ..... 97
- Bering Strait ..... 98
- Betty Moran ..... 36, 37, 69
- Big Bayou Canot ..... 148
- bitt ..... 98
- blind and shadow sector echoes ..... 114
- blind sector ..... 114
- Blunt self assessment ..... 121
- boat/ship handling ..... 54
- boat/ship handling techniques ..... 67
- boat handling ..... 1, 2, 39
- boat handling skills ..... 3
- boat handling techniques ..... 1
- bolt on boards ..... 16
- bottom characteristics ..... 91
- bottom clear of obstructions ..... 56
- bottom obstructions ..... 56, 91
- bow drive tractor tugs ..... 105
- bow line ..... 102
- box shaped push boats ..... 7
- breakers ..... 23
- breaking strength ..... 11
- breaking tandem tows ..... 91
- breast line ..... 101
- bridge allisions ..... 57, 144, 145, 146
  - causal factors ..... 144
  - non-linear dynamics of the causes ..... 145
  - predominant causal factor ..... 145
- Bridge Allision Work Group ..... 144
- bridge protection measures ..... 145
- bridle leg ..... 29, 41
