*Geometrical and engineering drawing for  
motor vehicle students*

# Drawing examples for motor vehicle engineers

131285

Longman

London and New York

---

## Preface

---

This book contains 334 classified examples in Geometrical and Engineering Drawing suitable for students studying motor vehicle engineering, and should prove of particular value to those preparing for the City and Guilds of London Institute examinations, Motor Vehicle Technicians' Certificate (390), Parts 1 and 2, and for similar examinations set by other boards.

I am most grateful to the examining boards listed below for their cooperation. In each case permission has been granted to use questions from their past examination papers, and to alter or to convert dimensions on some of these to approximate metric equivalents. It should be pointed out, however, that responsibility for the modifications and for any errors which may arise, particularly in the included answers, must be borne by the author.

City and Guilds of London Institute (CGLI)  
East Midland Educational Union (EMEU)  
North Western Regional Advisory Council for  
Further Education, incorporating the Union of  
Lancashire and Cheshire Institutes (NWRAC/  
ULCI)  
Union of Educational Institutions (UEI)  
The Institute of the Motor Industry (IMI)

S. J. Zammit

All dimensions are in millimetres unless otherwise stated.

The largest size drawing sheet required for the exercises will be A3 (420 × 297 mm).

---

## Contents

---

<b>Section A: Geometrical Drawing</b>	<b>1</b>
1. Geometrical Constructions	1
2. Tangency	3
3. The Ellipse	6
4. Loci	6
5. Piston Displacement Problems	7
6. Steering Linkage Problems	9
7. Valve Timing Diagrams	10
8. Cams	10
9. Forces and Vector Diagrams	11
<b>Section B: Engineering Drawing</b>	<b>16</b>
10. Conventions	16
11. Dimensioning	17
12. Limits, Fits and Tolerances	20
13. Screw Threads and Fasteners	21
14. Keys, Keyways, Splines and Pins	22
15. Bearings	23
16. Line Diagrams	23
17. Electrical Symbols and Circuit Diagrams	25
18. Isometric and Oblique Projection	26
19. Machine Drawing	29
20. Freehand Sketching	51
21. Miscellaneous Drawing Examples	54

---

## Index

---

- Abbreviations, 16  
Angle bracket, 17
- Balancing of rotating masses, 13, 14  
Base plate, 17, 19  
Battery terminal, 32, 35, 37  
Bearings, 23, 56  
Bellcrank lever, 29, 31  
Bending moments and shearing forces, 14, 15  
Blunking plug, 19  
Body jig clamp, 26, 27, 31  
Bolts, 21  
Bracket, two views of, 41  
Bumper support bracket, 26, 28, 36
- C-spanner, 3, 4  
Cam profiles, construction of, 10, 11  
Centre square, 54, 55  
Chain tensioning adjusting plate, 29, 30  
Circle, parts of, 2  
Circumscribed circle of triangle, 1  
Conventional representations, 16, 17  
Crane hook, 3, 5  
Cycloid, 6
- Dimensioning exercises, 17, 18  
Division of lines, 1  
Door clasp, details of, 40, 47  
Drop arm extractor, 39, 45
- Eccentric rotor type oil pump, 54, 56  
Electrical circuit diagrams, 25, 26  
Electrical symbols, 25
- Ellipse, constructions of, 6  
Elliptical-shaped locking plate, 6  
Engine mechanism, 7  
Engine mount bracket, 32, 36  
Engineers' try-square, 51, 52  
Escribed circle, 2  
Exhaust pipe clamp, details of, 44  
External tangent, 4
- Fabricated pipe clamp, 33, 37  
Fits, 20  
Fork end of towing bar, 29, 30, 34  
Freehand sketching, 51-4
- Gear selector fork, 32, 33, 34, 36  
Gear wheel-terms, 54  
Geometrical constructions, 1, 2
- Hexagonal drive tool, 26, 27  
Housing for clutch pedal spindle, 37, 42
- Inscribed circle of triangle, 1  
Internal tangent, 4  
Involute of a circle, 6  
Isometric projection, 26
- Keys and keyways, 22
- Lever, 4, 26, 28, 31  
Limits, 20  
Line diagrams, 23-5  
Loci, 6, 7  
Locking devices, 21
- Machine drawing, 29-40  
Machined block, 26, 27  
Main bearing cap, 29, 31, 34  
Mounting bracket for steering idler arm, 38, 43
- Nuts, 21
- Oblique projection, 26  
Orthographic projection  
  exercises, 29-40  
  sketching, 51  
Outside calipers, 3, 4
- Parallelogram of forces, 11, 12  
Part of a coupling, 26, 28, 34, 38  
Parts of brake pressure limiting valve, 40, 48  
Parts of steering idler box, 40, 49, 50  
Petrol engine piston, 37, 40, 53, 55  
Pictorial sketching, 51  
Pins, 22  
Piston displacement, 7, 8  
Polygon of forces, 12, 13  
Polygons, constructions of, 2  
Pressure cam, 38, 42  
Puller, details of, 39, 44  
Pulley wheel, 36, 38  
Pump rocker lever, 3, 4
- Rear axle casing gasket, 2  
Rear shackle plate, 17, 19  
Rear suspension bracket, 36, 39  
Relative velocity diagrams, 14  
Rivets and riveted joints, 21  
Rotor arm, 29, 32
- Screw threads, 21  
Screws, 21  
Sketching in orthographic projection, 51  
Sketching of electrical parts, 53, 54  
Sketching of engine parts, 53  
Sketching of workshop tools and equipment, 51, 53  
Splines, 22  
Spring shackle, 29, 33  
Steering linkage problems, 9  
Stepped flanged shaft, 17  
Studs, 21  
Support bracket, 29, 32

Suspension bracket, 37, 39

Tangency, 3

Template, 3, 4

Test rig, details of, 39, 46

Three-piece trackrod steering linkage, 8

Tolerances, 20

Tool rest for grinding machine, 32, 35

Triangle of forces, 12

Triangles, constructions of, 1, 2

Valve timing diagrams, 8

Vee block, 26, 27, 29

Washers, 21

Welding symbols, 17

Wheel hub, 29, 33, 34

Wing nut, 3, 5
