

MARINE DIESEL OIL ENGINES

A MANUAL OF MARINE
OIL ENGINE PRACTICE

EIGHTH EDITION—In Two Volumes

SPECIALLY COMPILED TO SATISFY THE STANDARD
OF THE MINISTRY OF TRANSPORT EXAMINATIONS

By

J. W. M. SOTHERN

Member, Institution of Engineers and Shipbuilders in Scotland; Member, Institute of Marine Engineers, London; Member, Association of Teachers of Marine Engineering; Hon. Member, Marine Engineers' Association; Hon. Member, Foreman Engineers and Draughtsmen's Association

Author of "Verbal Notes and Sketches"

REVISED BY

J. K. BOWDEN

Member, Institution of Engineers and Shipbuilders in Scotland; Member, Foreman Engineers and Draughtsmen's Association; First Class Board of Trade Certificate Lecturer, Sothorn's College of Technical Marine Engineering, Glasgow

JAMES MUNRO & COMPANY LTD.

16 CARRICK STREET, GLASGOW, C.2

Contents for Volumes One and Two

VOLUME ONE

SECTION A

GENERAL DEFINITIONS AND EXPLANATIONS

PAGES
A1-48

Definitions—2-Cycle—4-Cycle—Blast Injection—Solid Injection—Opposed Piston Type—Tuning Diesel Engines—Cylinder Head Valves—Starting Air Valves—Lubricating Oil Consumption—Clearance Volume—Conditions of Actual Combustion—Setting Fuel Pump—Fuel Pump Calculation—Consumption per I.H.P. and B.H.P.—Consumption at Various Loads—Proportion of Air to Fuel—Efficiencies—Wear of Cylinder Liners.

SECTION B

VARIOUS TYPES OF MARINE DIESEL OIL ENGINES

B1-224

Harland & Wolff Engines—4-Cycle S.A. Engine—4-Cycle Double-acting Engine—2-Cycle D.A. Engine—Single-acting 2-Cycle Engine—Doxford Engines—Sulzer Engines—British Polar Engines—Hawthorn-Leslie-Werkspeer Engine—Beardmore-Tosi Engine—Cammell-Laird-Fullagar Engine—Still Engine—Büchi Turbo-charging.

SECTION C

INTERNAL COMBUSTION ENGINES

C1-65

Explosion Systems: 2-Cycle, 4-Cycle—Magneto—Diagrams from 2- and 4-Cycle Explosion Engines—Carburetter—Vaporiser—Austin Lifeboat Engine—Timing Diagram for Petrol Engine—Coil Ignition Hot-bulb Engines—Timing Diagram for H.B. Engine—High-speed Diesel Engines—Allen Marine Auxiliary Oil Engine—Ruston Hornsby Marine Oil Engine—C.A.V. Fuel Pump.

SECTION D

INDICATOR DIAGRAMS

D1-97

Indicator Diagrams—4-Cycle S.A.—2-Cycle S.A.—Opposed Piston Engine—Timing Diagrams: 4-Cycle, 2-Cycle—Opposed Piston Engine.

SECTION E

VARIOUS DETAILS

PAGES
E1-96

Various Details—Connecting Rods—Fuel Pumps—Fuel Oil Systems—Piston—Crankshaft Repair—Bibby Detuner—Hydraulic Coupling—Okill Pressure Gauge—Crank Angles and Firing Sequences—Diagrammatic Sketches of Doxford Engine—H. & W. 2-Cycle D.A. Engine—"Loop" Scavenge and "Uniflow" Scavenge Systems—Michell Thrust Blocks—Electric Welding—Engine Test Plant—Kockum's Combined Fuel Pump and Fuel Valve—Crankshaft Alignment.

SECTION F

DATA FROM ACTUAL PRACTICE

F1-28

Data from Actual Practice—6-Cylinder S.A. Engine—8-Cylinder D.A. Engine—Opposed Piston Engines: 3-, 4-, 5-, and 6-cylinder—Sulzer Engines: 6-, 8-, 9-, and 10-Cylinder—Auxiliary Engines—Cylinder Liner Wear—Lubricating Oil Consumption—Drop in Air Pressure in Starting Air Tanks.

SECTION G

RUNNING TROUBLES: THEIR CAUSE AND REMEDY

G1-9

Running Troubles: Causes, Remedies, etc.—General Notes on Operation.

SECTION H

AIR COMPRESSORS

H1-47

Air Compressors—Testing of Valves and Intercoolers—Intercoolers—3-Stage Compressor—2-Stage Compressor—Weir 3-Stage Compressor—Valves for Compressor—Diagrams from Compressors—Combined Theoretical Diagrams—Effects of Increase of Clearance, Restricted Air Inlet, and Cooling—Air Tanks—Blast Air Bottles—Air Reducing Valve.

SECTION J

PRACTICAL OPERATION OF MACHINERY

J1-13

Practical Operations—Starting Preparations—Normal Conditions, Manœuvring, and Stopping—Spares, etc.—Repairs—General Precautions—Systematic and Periodic Overhaul—Duties of Engineers.

INDEX FOR VOLUMES ONE AND TWO

1-64

VOLUME TWO

SECTION K

FUEL OILS, COMBUSTION, AND LUBRICATING OILS, ETC.

PAGES
K1-71

Fuel Oil—Lubricating Oils—Pensky-Marten Flashpoint—Calorimeter—
Tests for Water in Oil—Admiralty Coefficient—Oil Fuel Coefficient—
Properties of Lubricating Oil—Oil for Cylinder and Air Compressors—
—Piston Lubrication—Delvac Lubricator—Centrifugal Separators—
Stream-line Filters—Lubricating Oil Pumps—Lubricating Oil Coolers—
“Comyn” Oil Separator—“Monitor” Alarm Systems—Tank Indicators.

SECTION L

STEERING GEARS AND TELEMOTOR GEARS

L1-56

Economic Valves—Steering Gear Cylinders and Valves—Shock
Absorber Springs—Steam Tiller—Hydraulic Steering Gear—Electric
Steering Gear—Telemotors.

SECTION M

BOILERS AND GENERAL NOTES

M1-46

Boilers and General Notes—Salinometer and Density—Notes on Scale
and Salting—Weir Evaporator—Weir Distilling Condenser and Filter
—Water Gauge Tests for Acidity—Safety Valves—Sketch of Boiler
Manhole Compensating Ring—Boiler Mountings—Cochran Boiler—
Wallsend Low Air-pressure System—W.T. Boilers.

SECTION N

THE “STONE” SYSTEM OF HYDRAULIC CONTROL OF
BULKHEAD DOORS

N1-12

“Stone” System of W.T. Door Control

SECTION O

GENERAL NOTES AND SKETCHES ON MAGNETISM AND
ELECTRICITY

O1-135

Definitions — Magnetism — Batteries — Accumulators — Dynamos —
Armature — Commutator — Switchboard — Volt and Ampere Meters
— Switches — Wiring Systems — Megger — Motors and Starters
— Dynamos in Parallel — Three-wire Systems — Hints on Running —
A.C. Motors — Alternators.

SECTION P

PRECAUTIONS AGAINST FIRE

Precautions against Fire—Fire-extinguishing Apparatus—"Phomene" System—"Pyrene" Foam System—"Petrofoam" Extincteur—CO₂ Fire Extinguisher.

PAGE
P1-4

SECTION R

REFRIGERATION

Compressed Air, NH₃, and CO₂ Systems—Intermediate Cooling System—Brine—Freon System—Methyl-chloride System.

R1-4

SECTION S

HULL CONSTRUCTION DETAILS

Hull Construction Details—Definitions—Sections of Hulls—Metacentric Height—Isherwood System—Stern Brackets for Twin-screw Vessel—Rudders—Davits—Centrifugal Pump—Drysdale Pumps—Bilge Pumping System—Shafting—Stern Tube and Shaft—Patent Stern Tube—Propeller.

S1-70

SECTION T

QUESTIONS AND ANSWERS

Questions and Answers as set at the Ministry of Transport Examinations.

T1-113

SECTION U

DATA, METRIC SYSTEM, CALCULATIONS, AND LOGARITHMS

Data—Metric System—Calculations—Logarithms.

U1-20

INDEX FOR VOLUMES ONE AND TWO

1-64
