### Contents

**Chapter 5**  
**Budgeting, Scheduling, and Preproduction**  
- Budgeting for Sound  
- Allow Time for Sound  
- Checking Locations

**SECTION III PRODUCTION SOUND**

**Chapter 6**  
**Microphones and Room Acoustics**  
- About Microphones  
- Rooms and Recording

**Chapter 7**  
**Production Mic Technique**  
- What Kind of Mic to Use?  
- Using Boom Mics  
- Using Lavalieres  
- Controlling Wind Noise  
- Using Wireless  
- Room Tone

**Chapter 8**  
**Production Recording**  
- Getting Audio Into a Recorder  
- Camera Settings  
- Double System  
- Mixers and Preamps  
- Connecting to the Recorder  
- Adjusting the Volume

**Chapter 9**  
**Recording Voice-Overs, ADR, and Effects**  
- Engineering a Voice Recording  
- Directing The Voice-over  
- Recording Sound Effects

**SECTION IV POSTPRODUCTION**

**Chapter 10**  
**Postproduction Workflow**  
- Linear and Nonlinear Editing

**Chapter 11**  
**Postproduction Hardware**  
- Monitoring  
- Computer Input/Output  
- The Mixer  
- Moving Signals Around the Editing Suite  
- Wiring The Postproduction Suite  
- Mixing -10 Dbv and +4 Dbu Equipment
Chapter 12  **Levels and Digitizing**  
Digital Audio Transfers  263  
Digitizing Analog Signals  264  
Metering and Lineup Tones  271  
Synchronization  278

Chapter 13  **Editing Voices**  
The Right Tools for Editing Voice  293  
Editing I: Cutting in Silences  294  
Editing II: Sounds with Hard Attacks  296  
Editing III: Hearing Phonemes  297  
Editing IV: Theatrical Film Dialog  300  
Editing V: The Tricks  305  
Editing VI: Keeping Track of Sync  308  
A Final Exercise  309

Chapter 14  **Working with Music**  
Deciding What Music You’ll Need  313  
Sources of Music  315  
Selecting Music from a Library  317  
Music Editing  328

Chapter 15  **Sound Effects**  
We Don’t Need No Stinkin’ Reality  330  
Sources for Sound Effects  339  
Choosing Effects  341  
Placing Sound Effects  344

Chapter 16  **Processing**  
How any Effect can Wreck a Sound  345  
When to Apply Processing  352  
Equalizers  353  
Compressors  354  
Reverberation  356  
Noise Reduction  363  
Combining Effects  369  
Learning More  375

Chapter 17  **The Mix**  
Setting up for the Mix  378  
Preparing for Someone Else to Mix  380  
After the Mix  381  
The Last Thing You Should Do  395

Chapter 18  **“Help! It Doesn’t Sound Right!”**  
Problems With On-Camera Dialog  397  
Too Many Background Noises  399
Dialog Problems Introduced by the Recorder 402
Postproduction Audio Issues 403
Narration Problems 406
Computer Doesn’t Play Audio Well 406
Editing Problems 407
Mix Problems 408
The Mix Sounded Great on the Desktop or Mixing Studio, but Bad on the Air or in the Conference Room 408
The Mix Proportions Were Right, but It Was Too Soft/Loud/Distorted on the Air 408
Some Elements Sound Fine in Stereo, but Disappear when the Tape Is Broadcast, Played on VHS, or Seen on the Web 409
Other Common Questions 410

Appendix A  Glossary 412
Appendix B  Resources 418
            Organizations 420
Appendix C  CD Contents 422

Index 429
Index

A
AAC, see Advanced audio coding (AAC)
Acid software, for music looping, 325
Active adapters
balance, 160
build-it-yourself, 160
mixers and preamps, 159-160
Actors
lav coverage, 144
mumbling, 400
narrator interview, 203-204
voice-over sessions, 202-203
Adapters
active, 159-160
transformer, 158-159
ADR, see Automatic dialog replacement (ADR)
Advanced audio coding (AAC)
characteristics, 39
compression effects, 368
AES/EBU, see Audio Engineering Society/European Broadcast Union (AES/EBU) standard
AFTRA, see American Federation of Television and Radio Artists (AFTRA)
Air-conditioning systems, as location noise problem, 97-98
Airplane noise
as location noise problem, 96
and mic techniques, 147
AKG, wireless mics, 112, 149
ALC, see Automatic level control (ALC)
Alesis ADAT, 250
Algorithms
AAC, 39
MP3, 39
MPEG4, 39
Aliasing
and Nyquist limit, 33
and sample rate, 32-33
Aliasing filter, definition, 33
AlphaTrack, hardware controller, 248
Ambiences
in audio postproduction, 230
definition, 81
recording, 210-211
Ambient TinyMike, 158
American Experience, 203
American Federation of Television and Radio Artists (AFTRA), and voice-over narration, 196
Amplifiers
digital amplifiers, 241
and impedance matching, 260
room equalization, 241
selection, 240-241
Analog audio, dynamic range, 29
Analog audio wiring
balanced-unbalanced connections, 50
balanced wiring, 47-49
basic considerations, 41-42
Category-5 wiring, 52-53
connectors, 49-50
cross-connecting, 46
level and dynamic range, 45-46
line noise, 46-47
nominal levels, 44-45
Ohm's law, 42-43
standards, 43-44
star-quad, 51-52
Analog signal digitization
basic concept, 271-272
gain-staging, 272-273
input quality, 273-274
level problem diagnosis, 277-278
NLE meter calibration accessory attenuator, 276-277
linear and boosted, 276
steps, 274-276
Analog-to-digital audio
analog myths, 27-29
basic consideration, 23-24
bits as dynamic range, 26-27
bits overview, 25-26
16-bit standard, 26
decibels and digital, 27
dithering, 29-31
sample depth, 23-24
Analog voltmeter, and VU meters, 279
Announcer
equalizer adjustments, 362
preparation for narration, 200-201
Antenna, wireless mics, 153-154
Apple
FireWire specs, 265-267
GarageBand, 325
iTunes, 325, 358
APT, audio encoding standards, 39
ASCAP, and music tracks, 323
Attack, in time compression, 366
Attenuators
camcorder audio, 168-169
and microphone settings, 125
recorder connections, 179-181
Attitude, in voice demos, 197
Audacity software, for digital metering, 281
Audio data reduction
basic considerations, 36
delta encoding, 36-37
lossless encoding, 37
Audio Engineering Society/European Broadcast Union (AES/EBU) standard
in basic editing suite, 254
characteristics, 54
cross-connections, 57-58
Audio-level meters, VU meters, 278-279
Audio Ltd TXU series, wireless mics, 149
Audio mixer
postproduction time, 95
sound budgeting, 84-85
in sound preproduction, 91
Audio Postproduction, 379, 390
Audio processing
as packets, 56
postproduction organization, 227-228
priorities, 229-230
scratch tracks, 228-229
temporary music, 229
### Audio quality
- camcorders, 164–166
- postproduction issues, 403–405

### Audio studio, as postproduction cost
- 89–90

### Audio-Technica
- booming gear, 132
- head-worn mics, 145
- wireless mics, 149

### Automated mixing
- basic concepts, 393
- modes, 393–394

### Automatic dialog replacement (ADR)
- and automatic equalizers, 361
- film vs. video workflows, 227
- predubs, 382
- reverb, 371, 372, 373
- sound checks, 187
- sound matching, 193
- techniques, 194–195
- time requirements, 91–92

### Automatic equalizers, function
- 360–361

### Automatic level control (ALC)
- camcorder audio, 169–170

### Automation, mixing
- 383

### Avid, OMF design
- 224–225

### Azden, wireless mics
- 149

### B

#### Background noise
- issues, 401–402
- from shoot, 405
- variations, 403

#### Background sound
- in audio postproduction, 230
- definition, 81
- finding locations, 210
- recording, 211
- sound effects fullness, 348–349
- sound effects looping, 347–348

#### Bad filmmaking, sound problems
- 17

#### Balanced wiring
- advantages, 47–49
- and line noise, 46
- unbalanced connections, 50

#### Balun transformers, in Cat-5
- wiring, 53

#### Bandwidth (Q)
- and equalizer tuning, 358
- filters, 360
- peaking equalizers, 357
- shelving equalizers, 359

#### Bar, in music editing
- 331

#### Barometric pressure, definition
- 19

#### BBC, camcorder audio contributions
- 171–172

#### BeachTek
- active adapters, 159
- camcorder audio, 171
- DX6A, 158

#### Behringer BCF-2000
- 247–248

#### Betacam tapes, digitization
- 271–272

#### Beyerdynamic, booming gear
- 132

#### Bias, SoundSoap software
- 376

#### Bi-directional microphones
- real-world patterns, 116

#### Birth of a Nation
- 314

#### Bit depth
- camcorder audio, 168
- in digital audio transfers, 270

#### Bits
- and dithering, 29–30
- as dynamic range, 26–27
- in sample depth, 25–26
- standards, 26

#### Blanc, Mel
- 61

#### BMI, and music tracks
- 323

#### Boom microphones
- characteristics, 130–131
- choice, 129
- locations, 134–135
- operation, 132
- stereo, 117

#### Boom operation
- accessories, 133–134
- basic concept, 134
- and boomer, 131
- boom handling, 138–139
- distance considerations, 136
- extension, 137–138
- multiple actor considerations, 135
- perspective control, 137
- pole and shockmount, 132–133

#### Boom operators
- accessories, 133–134
- skills, 131
- in sound budgeting, 85
- in sound preproduction, 91
- staying out of shot, 135–136

#### Boundary microphones
- characteristics, 109–110

#### Breath, voice editing tricks for
- 308

#### Broadcast sound
- boom vs. lavaliere, 129
- problems, 409
- quality, 71
- room tone, 156

#### Broadcast wave file (.bwf)
- in ingesting, 264

#### B-roll, double system recorder
- 173

#### Budgeting
- audio mixer, 84–85

#### Buyout libraries
- for music, 322–323
- music offerings, 327

#### Bypass control, compressors
- 364

#### Cabbage, for Foley
- 209

#### Cable, for digital audio transfer
- 268

#### Calibration
- in analog signal digitization, 274–277
- VU meters, 283

#### Camcorder audio
- automatic level control, 169–170
- basic rules, 171
- BBC contributions, 171–172
- distortion, 168
- historical perspective, 171
- manufacturer specifics, 170–171
- mic noise reduction, 170
- noise, 168
- performance examples, 167
- quality, 164–166
- sample rate and bit depth, 166, 168
- volume controls, 168

#### Camera microphones
- characteristics, 118

#### Capture
- and digital audio transfers, 264–265
- in sound postproduction, 93

#### Cardioid microphones
- characteristics, 110–111
- and dialog replacement, 193
- direction, 116–117
- sound checks, 187

#### Carabiner clip, for booming
- 134

#### Casting
- voice demos, 197–198
- for voice-over narration, basic considerations, 195
- voice type, 196–197
Index • 431

Category-5 wiring, basic principles, 52-53
Cat food, for Foley, 209
CD-ROMs, sound effects libraries, 343
CDs, see Compact discs (CDs)
Cell phones, and mixing, 253-254
Center channel, dialog, 76-77
Ceramic microphones, characteristics, 122
Character identification, via music, 78
Children, voice-over work, 205-206
Chorus effect, function, 374
Cinescore, 320
Clarinet, envelopes, 10
Clips, definition, 222
C-loop, 348
Clothing
and lav attachment, 143
and lav noise, 145
Colorations, and pressure, 15-16
Comb filtering, function, 374-375
Compact discs (CDs)
and audio capture, 93
background locations, 210
buyout music libraries, 322
dialog center channel, 76
error-concealment, 22-23
modern music libraries, 318-319
music library sources, 329
needle-drop music libraries, 321-322
players, 249-250
players in basic editing suite, 254
players and unbalanced equipment, 259
professional sound effects libraries, 342
retail sound effects sources, 342
and sample rate, 32, 269
source music sources, 327
and speaker setup, 240
speaker testing, 239
and track importing, 223
vocal sound effects libraries, 211
in voice-over session, 87-88, 204
for voice recording, 188
voice talent example, 196
Compa...
and impedance matching, 260
Layer 3, 38–39
lossless encoding, 37
masking, 37–38
MP3, 38–39
MP3 reputation, 39
Nyquist limit, 32–33
oversampling, 33–34
perceptual encoding, 37–38
robustness, 21
sample rate considerations, 31–32
sample rates, 34–36
from sound pressure, 20–21
Digital audio cable, and amplifiers, 241
Digital audio processors, in digital audio transfers, 271
Digital audio tapes (DAT) and audio capture, 93
in audio postproduction, 230
in basic editing suite, 254
for capture, 264–265
confidence heads, 190
double system recording, 175
error-concealment, 22–23
and nonaudio wiring, 261
in sound budgeting, 86, 87
in voice-over recording, 87–88
voice-over session, 204
for voice recording, 188
Digital audio transfers
bit depth, 270
cable for, 268
capture, 264–265
data compression step, 271
digital audio processors, 271
FireWire, 265–267
FireWire issues, 267–268
ingesting, 264
normalizing, 270–271
sample-rate conversions, 269
sync source choice, 269
via USB, 268
Digital audio wiring
AES/EBU standard, 54
audio as packets, 56
cross-connection, 56–57
data errors, 57–58
Dolby E standard, 56
FireWire, 55
impedances, 53–54
multi-track, 56
SDI, 56
s/pdif standard, 54
Toslink, 55–56
USB, 55
Digital audio workstations (DAWs)
for editing/mixing, 222
hardware controllers, 247
ingesting, 264
mixing in the box, 383
NLE project sharing
edit decision lists, 225
interchange formats, 224–225
track importing, 223
and nonaudio wiring, 261
process automation, 395
reverbs, 371
simultaneous mixing and editing, 230–231
voice editing exercise, 299
Digital cable TV, wiring, 258
Digital Foley, definition, 206
Digital hybrid wireless microphones, characteristics, 153
Digital intermediates, film vs. video workflows, 226
Digital metering
Audacity software, 281
Inspector software, 280
log vs. linear, 282–283
multi-display programs, 281–282
Digital rights management (DRM), as copy protection, 40
Digital signal processing (DSP), for sound effects, 379
Digital tuning fork, example, 21
Digital video cameras, oversampling, 34
Digital video disks (DVD) and audio capture, 93
audio encoding standards, 39
and monitor controller, 242
and sample rates, 35
in sound budgeting, 87
and track importing, 223
in video editing, 220
Digital wireless microphones, characteristics, 152–153
Digitization
analog signals, see Analog signal digitization as sound postproduction cost, 88–89
Diphthongs, in voice editing, 304
Directional microphones
basic operation, 106
hole design, 111
problems, 115
Distortion
camcorder audio, 165–166, 168
equalizer adjustments, 363
in mixing, 391–392
Dithering, in analog-to-digital audio, 29–31
Diversity receivers, and wireless mics, 150–151
Dolby
audio encoding standards, 39
digital wiring standard, 56
noise reducers, 376
postproduction costs, 90
Double-balanced wiring, definition, 51
Double system recorders
characteristics, 158
computer, 177
DATs, 175
definition, 85
flash RAM, 176–177
hard drives, 176–177
lip-sync, 174
MiniDisc, 175–176
non-timecode speed stability, 173–174
overview, 172–173
timecode, 173
Downward expander, for noise reduction, 376
DRM, see Digital rights management (DRM)
Dropframe, in timecodes, 285–286
DSP, see Digital signal processing (DSP)
Dubbing, after mixing, 398
Dub stage
in audio postproduction, 230
definition, 21
DVD, see Digital video disks (DVD)
Dynamic microphones
characteristics, 118–119
condenser comparison, 121
and impedance, 162
Dynamic range
in analog audio, 29
in analog wiring, 45–46
bits as, 26–27
camcorder audio quality, 165
Dynamic scrubbing, definition, 295
E
Echoes
and pressure, 15–16
vs. reverb, 373
room and random, 400–401
small room considerations, 15–17
small room soundproofing, 18–19
Edit decision list (EDL)
in NLE–DAW project sharing, 225
in nonlinear editing, 219
Editing
edit/mix within NLE, 221
linear editing considerations, 220-221
music, see Music editing
with NLE software, 221-222
in nonlinear editor, 291-292
on-camera dialog, 73
in postproduction workflow, 218-219
problems, 407-408
simultaneous mixing, 230-231
traditional film sound, 291-292
voice, see Voice editing
Editing room acoustics
basic concepts, 233
homemade sound absorber, 234-235
soft and hard, 233-234
Editing suites
basic set-up, 254-255
patchbay, 255-256
switchers and routers, 256
Editorial, in sound
postproduction, 93-95
EDL, see Edit decision list (EDL)
Effective sounds, see Sound effects
Effects processors
combining effects, 378-379
compressors, 363-368
destructiveness, 355
effects definition, 352
enhancements, 379
equalizers, 356-363
monitor quality, 353-354
multiband noise reducers, 376-377
for noise reduction, 375-378
noise-reduction strategies, 377-378
order of effects, 356
overloads, 353
presets, 354
reverberators, 369-374
soft sounds, 353
time requirements, 355
vocal elimination, 375
Electret condenser, 120
Electronic interference, location
checks, 98-99
Electro-Voice RE-27, 119
Emesser, stereo mics, 117
Emotion, via music, 78
Encoding standards
Layer 3, 38-39
miscellaneous standards, 39-40
MP3, 38-39
perceptual encoding, 37-38

Envelopes
frequency overlap, 11
and pressure changes, 9-11
and time compression, 366
Equalizers
automatic equalizers, 360-361
filters, 359-360
function, 356-357
graphic equalizers, 358-359
and time compression, 366
learning bands, 361-362
in mixing, 389
with other effects, 378
overequalization, 375-378
peaking equalizers, 357-358
shelving equalizers, 359
tuning, 358
usage tips, 362-363
Equipment
budgeting, 85-86
as location noise problem, 96-98
non-electronic voice recording, 190-191
sound vs. video rentals, 86
unbalanced, in postproduction suite, 259-260
for voice recording, 188-190
Error-concealment, in digital audio, 22-23
Ethernet
ground-loop elimination, 257
and hardware controllers, 248
Extensions, voice editing tricks
for, 309
Exterior noise, as location problem, 96
External polarization, condenser mics, 120
F
Feature films
boom mic preference, 129
room tone, 156
Field mixer, for production recording, 179
Film-audio synchronization
editing on computer, 291-292
editing in NLE, 290-291
overview, 288-289
pilot tones, 289
self-clocking, 290
Filters, equalizers, 359-360
FireWire
in basic editing suite, 254
as computer input device, 243-244
in digital audio transfers, 265-267
as digital wiring standard, 55
and nonaudio wiring, 262
switchers, 256
Flange effect, function, 374
Flashlight, for booming, 134
Flash RAM
double system recorders, 176-177
in ingesting, 264
in video editing, 220
Flip loop, 348
Foldback, definition, 101
Foley effect
clean recording, 207
definition, 206
footsteps, 208-209
noisemakers, 207-208
reverbs, 371, 372
selections, 207
useful grocery store items, 209

application, 372-373
convolution reverbs, 371
vs. echo, 373
evaluation, 372
as location problem, 98
in mixing, 389
in music editing, 338
with other effects, 378-379
real reflections, 369-370
special effects based on, 374-375

Ribbon microphones
characteristics, 121-122
and impedance, 162
sound checks, 187

Ricsonix Pin-Mic, characteristics, 143-144

Ringer equivalent number (REN), definition, 253

Robin Hood, 96
Roddenberry, Gene, 339

Roll-off filter, and microphone settings, 124

Room acoustics
cutting reflections, 126-127
editing room acoustics, 233-235
flexible solutions, 127
and mic techniques, 156
space testing, 125-126
Room equalization, and amplifiers, 241

Routers, in editing suite, 256
RS-232, and hardware controllers, 248

S
SAG, see Screen Actors' Guild (SAG)

Sakakeeny, Wendie, 203-204
Sample, definition, 24

Sample depth
in analog-to-digital audio, 23-24
bits overview, 25-26
decibels and digital, 27
definition, 24

Sample frequency, definition, 24

Sample rate
and aliasing, 32-33
basic considerations, 31-32
camcorder audio, 168
and Nyquist limit, 32-33
working with, 34-36

Sample-rate conversions, digital audio transfers, 269

Samplers, in mixing, 251

Sampling reverberation, processing, 371
Samson, wireless mics, 149
Scene setting, with music, 79
Scheduling, mixing sessions, 386
Schoeps gear, 111, 125, 132
Schwartz, Tony, 74, 340

Scoring
basic considerations, 77-78
for character identification, 78-79
as emotional statement, 78
for plot development, 78-79
popular music pitfalls, 79-80
scene setting, 79

Scratch tracks, in audio postproduction, 228-229
Screen Actors' Guild (SAG), and voice-over narration, 196

Script
announcer preparation, 200
preparation for voice session, 201-202
sound effects, 69-70
sound notes, 67-69
sound references, 66-67
voice-over session notes, 204-205
words in sound planning, 66-67

Script stand, for voice recording, 190, 191

Scrubbing
in non-scrubbing programs, 295-296
in voice editing, 295
Self-clocking, in film-audio synchronization, 290

Sennheiser
booming gear, 132
wireless mics, 149
Serial Digital Interface (SDI), as digital wiring standard, 56

Sesame Street, 74

Shelving equalizers, function, 359

Shockmount, in booming, 132-133

Shoot
background noise, 405
time requirements, 91-92

Shotgun microphones
booming gear, 132
characteristics, 112-113
and dialog replacement, 193
as mic choice, 129
sound checks, 187
wind noise control, 146

Shure gear, 119, 133, 149
Shutter bar, definition, 290

Shutting
timecode, 288
in voice editing, 295

Sidechains, function in compressors, 367-368
Signal-to-noise ratio, camcorder audio quality, 165
Silence, in voice editing, 296-297
Simplex power, for microphones, 124
SimulDat, for dubbing, 291
Single-ended wiring, definition, 49
Single-system recorder, characteristics, 157-158
Single-system sound, definition, 85

Small rooms
echo considerations, 15-17
soundproofing, 18-19

SmartSound, Sonicfire Pro, 320
