Adobe Photoshop CS4 for Photographers: The Ultimate Workshop

Martin Evening and Jeff Schewe

AMSTERDAM • BOSTON • HEIDELBERG • LONDON • NEW YORK • OXFORD
PARIS • SAN DIEGO • SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO
Focal Press is an imprint of Elsevier

Introduction.....	viii
Acknowledgements.....	viii

Chapter 1: Before you shoot 1

Before you shoot that picture!.....	2
Interpreting a brief.....	2
Shooting multiple elements – intelligently.....	4
Multi light blending technique.....	6
Complex composite work.....	8
Fashion and beauty retouching.....	10
When not to use Photoshop.....	12

Chapter 2: Raising your IQ 15

Optimizing images.....	16
Camera Raw or Photoshop?.....	16
Camera Profiles in Camera Raw.....	18
Optimizing the image tones.....	20
Optimizing an image in Camera Raw.....	20
Optimizing the highlights.....	21
Optimizing the blacks.....	22
Optimizing both the highlights and blacks.....	24
Cut-outs against a white background.....	25
Essential image editing steps.....	28
Crop.....	30
Color.....	31
Tone.....	32
Exposure.....	32
Recovery.....	33
Blacks.....	34
Fill Light.....	35
Brightness.....	35
Contrast.....	36
Finesse.....	37
Clarity.....	37
Vibrance.....	38
Capture sharpening.....	39
Amount and Radius.....	39
Detail and Masking.....	40
Noise reduction.....	40
Perspective corrections with Camera Raw.....	42

Capture sharpening workflow.....	46
Improving camera capture sharpness	50
Choice of camera lens	50
Shooting with a tripod vs. hand-held	52
Improved sharpness using mirror-up mode.....	52
Noise reduction.....	54
Photoshop noise reduction.....	54
Third-party noise reduction	54
Targeted noise reduction.....	55
Removing noise using multiple exposures	58
Sculpting photos.....	62
Improving midtone contrast.....	67
High radius Unsharp Mask technique.....	70

Chapter 3: Mending and blending

73

General retouching.....	74
Healing brush strategies.....	74
Adding lens flare	76
Simulating film grain.....	78
Removing foreground objects.....	80
Layer blending to remove tourists	82
Median rendering	82
Merging objects with displace distortion.....	86
How to create a spotlight effect.....	90
Fashion and beauty retouching.....	92
Adding lightness and contrast to the eyes	92
Repair work using a copied selection	94
Removing stray hairs.....	96
Tidying hair against a busy backdrop	98
Coloring hair roots	102
Beauty skin retouching	104
Disguise your retouching.....	104
Brush blending modes	105
Beauty/fashion retouching.....	106
Retouching portraits.....	112
How to remove reflections from glasses	118
How to create a sparkle brush shape	121
Vanishing Point.....	124
Vanishing Point planes and measurements	130
Editing objects in 3D.....	134

Chapter 4: Masking and compositing**139**

Compositing work.....	140
Creating a realistic composite	140
Masking hair	148
How it works.....	148
Getting the different elements to match.....	149
Refine Mask command	158
Snapshot painting	162
A different way of compositing.....	162
Slicing an image.....	164
Image warping.....	164
History basics	167
Making snapshots	168
The channels	169
The blending	170
The wrap up.....	176
Combining images.....	178
The best way to combine exposures.....	178
Cheating a mask.....	182
Masking an object with a path	186
Working with Smart Objects.....	190
Adding atmospheric.....	198
Simulating the effect of motion.....	204
Embossing the word.....	205
Adding motion.....	210
Adding Lens Blur.....	216
Extending the depth of field	220
Merging studio exposures.....	224
Layer Styles	230
How to add extra water drops to a glass	231
Copying layer styles	236
How to remove edge flare	236

Chapter 5: Cooking with Photoshop**239**

Photomerge.....	240
Resizing the source images	243
A simple, one-step Photomerge	244
A three-step Photomerge.....	246
Extreme wide-angle Photomerges	252
Filter effects	256
How to create a fisheye lens effect.....	256

How to create an aerial fisheye lens effect	261
Working with Liquify	263
The Photoshop diet	268
Content-aware scaling.....	270
Content-aware scaling – another use.....	272
Digital darkroom effects	274
Advanced black and white conversion	274
Cross-processing.....	278
Lab Color effects	282
Simulating black and white infrared film.....	286
Black and white solarization	290
Hand-coloring a photograph	294
Coloring an object.....	298
Coloring effects using Match Color.....	302
Match Color auto adjustments.....	304
Using Camera Calibration to distort colors.....	306
Nocturnal effect.....	308
Preserving the pixels	308
Preserving colors with ProPhoto RGB.....	312
Softening the focus.....	314
Fog effect.....	314
Diffused printing effect	316
Adding progressive blurs	318
Image border effects.....	320
Adding a border to an image	320
Adding a Clouds filter border	324

Chapter 6: Photoshop output

327

Fine-art printing.....	328
Inkjet printers	328
How inkjet printers work.....	328
The ideal inkjet	330
Photographic print quality	330
Image preservation	330
Inks and media	331
Third-party inks.....	332
Inkjet economies.....	332
Building a custom printer profile	333
Printing a printer test target	333
Getting the most from your printer profiles.....	338
Display gamut versus printer gamut	339

Soft proofing via the display.....	339
Display simulation options	341
Color proofing for press output.....	343
CMYK proofing with an inkjet.....	344
Simulation and Rendering Intents.....	344
CMYK output	346
Preparing files for output.....	346
Delivering files for output	350
Is CMYK for you?	351
Spot color channels.....	352
Preparing screen shots for publication.....	354
Scaling dialog screen images	354
Creating a droplet to process screen shots	356
Max Black generations.....	357
Recording a Max Black separation action	358
Dual CMYK conversions.....	359

Chapter 7: Minding your own business

367

Adding value to your images.....	368
Identifying your images	369
File organization methods	370
Archiving issues.....	372
Backing up is not archiving!	372
Backing up your data.....	374
Image protection.....	376
How to make money with Photoshop	377
How much are you worth?.....	377
Your rate is your rate.....	379
How to bill for digital.....	380
