
Handbook of Research on Adult Learning and Development

Edited by

M Cecil Smith

Northern Illinois University

with

Nancy DeFrates-Densch

Northern Illinois University

Assistant Editor

Contents

<i>Preface</i>	xi
<i>Chapter Reviewers</i>	xxi

PART I

Theoretical Perspectives on Adult Development and Learning **I**

- 1 Challenges for the Current Status of Adult Developmental Theories: A New Century of Progress **3**
FREDDA BLANCHARD-FIELDS AND ANTJE STANGE KALINAUSKAS
- 2 Emerging Adulthood: Learning and Development During the First Stage of Adulthood **34**
JENNIFER L. TANNER, JEFFREY JENSEN ARNETT, AND JULIE A. LEIS
3. Models of Adult Development in Bronfenbrenner's Bioecological Theory and Erikson's Biopsychosocial Life Stage Theory: Moving to a More Complete Three-Model View **68**
CAROL HOARE
4. Cognitive Development as the Dance of Adaptive Transformation: Neo-Piagetian Perspectives on Adult Cognitive Development **103**
JAN D. SINNOTT

PART II

Research Methods in Adult Development **135**

- 5 Analyzing Change in Adulthood with Multilevel Growth Models: Selected Measurement, Design, and Analysis Issues **137**
JANET K. HOLT
6. Research Synthesis and Meta-Analysis **162**
JEFFREY C. VALENTINE AND HARRIS COOPER

PART III**Research on Adult Development 181**

- 7 Epistemological, Intrapersonal, and Interpersonal Development in the College Years and Young Adulthood 183
MARCIA BAXTER MAGOLDA, ELISA ABES, AND VASTI TORRES
- 8 Addressing Stability and Change in the Six-Foci Model of Personality: Personality Development in Midlife and Beyond 220
CORY R. BOLKAN, PATRICIA MEIERDIERCKS, AND KAREN HOOKER
- 9 Adjustment and Growth: Two Trajectories of Positive Personality Development across Adulthood 241
URSULA M. STAUDINGER AND EVA-MARIE KESSLER
- 10 Attachment and Marriage 269
GARY CREASEY AND PATRICIA JARVIS
- 11 The Influence of Family Relationships on Adult Psychological Well-Being and Generativity 305
NADINE F. MARKS AND EMILY A. GREENFIELD
- 12 The Close Relationships of Sexual Minorities: Partners, Friends, and Family 350
LISA M. DIAMOND AND MOLLY BUTTERWORTH
- 13 Gender Strategies: Socialization, Allocation, and Strategic Selection Processes Shaping the Gendered Adult Life Course 378
PHYLLIS MOEN, ERIN KELLY, AND RACHEL MAGENNIS
- 14 Career Development, Work, and Occupational Success 412
ERIK J. PORFELI AND FRED W. VONDRACEK
- 15 Religious and Spiritual Development in Adulthood 436
PAUL WINK

PART IV**Research on Adult Learning 461**

- 16 A Brief History of Research and Theory on Adult Learning and Cognition 463
DENNIS THOMPSON

17	Expertise and the Adult Learner: A Historical, Psychological, and Methodological Exploration	484
	PATRICIA A. ALEXANDER, P. KAREN MURPHY, AND JONNA M. KULIKOWICH	
18	An Integrative Model of Everyday Problem Solving Across the Adult Life Span	524
	CYNTHIA A. BERG, MICHELLE SKINNER, AND KELLY KO	
19	Changes in Goal-Striving Across the Life Span: Do People Learn to Select More Self-Concordant Goals as They Age?	553
	KENNON M. SHELDON	
20	Informal and Incidental Learning in the Workplace	570
	VICTORIA J. MARSICK, KAREN E. WATKINS, MARY WILSON CALLAHAN, AND MARIE VOLPE	
21.	Literacy in Adulthood	601
	M CECIL SMITH	
22	Service-Learning, Civic and Community Participation: Contributions to Adult Development	636
	SUSAN R. JONES AND ANNA GASIORSKI	
23.	Attention-Deficit/Hyperactivity Disorder in Adults	670
	LISA L. WEYANDT	
PART V		
Aging and Gerontological Research		693
24	What Do We Know About the Aging Brain?: Implications for Learning in Late Life	695
	BENJAMIN T. MAST, JENNIFER ZIMMERMAN, AND SARAH V. ROWE	
25	Wisdom, Integrity, and Life Satisfaction in Very Old Age	732
	MONIKA ARDELT AND STEVE JACOBS	
PART VI		
Policy Perspectives on Aging		761
26	Social Trends and Public Policy in an Aging Society	763
	JUDITH TREAS AND TWYLA HILL	

<i>Postscript</i>	784
<i>Contributors</i>	785
<i>Index</i>	789

Index

A

- Abortion, emerging adulthood, 53
- Accidental learning, 571–572
- Acclimation, Model of Domain Learning, 501–502
- Accommodation, 19, 103
- Action research, 572
- Action science, 572
- ACTIVE study, 701–702
- Adaptive transformation, cognitive development, 103–130
- Adderall, Attention-Deficit/Hyperactivity Disorder, 678, 679
- Adjustment
 - agreeableness, 245–246
 - Big Five, 245–246
 - conscientiousness, 245–246
 - coping strategies, 252–254
 - defining, 241–242
 - ego development, 251
 - emotion regulation, 257–258
 - facets, 243–245, 244
 - Freud's theory of personality development, 241
 - indicators, 243–245, 244
 - neuroticism, 245–246
 - openness to new experiences, 245–246
 - process-related markers, 252, 252
 - Selective Optimization with Compensation model, 254–255
 - self-concept, 247–249
 - structural markers, age trajectories, 245–251
 - systemic regulatory processes, 254–255
 - types, 241–243
 - values, 255–257
 - well-being, 246–247
 - wisdom, 249–251
- Attention-Deficit/Hyperactivity Disorder, 670–671
 - emerging adulthood, contrasted, 36
 - mental health problems, 45, 46–47
 - young adulthood, individual pathways, 38–40, 39
- Adult Attachment Interview, 280
- Adult child role
 - generativity, 331
 - well-being, death of parents, 330–331
- Adult development
 - biogenetics, 96–97
 - characterized, 74–75
 - cognitive, learning, 114–115
 - college years
 - counteracting messages that oppress, 210–211
 - mentors, 211
 - promoting, 208–210
 - context, 96–97
 - definitions, 74–76, 83
 - fragmentation in field, 68
 - Freud, Sigmund, stasis and developmental negatives, 73–74
 - functionalist perspective, 3
 - growth models, 137–159
 - applications, 151–154
 - intra-individual change in personality traits, 151–154
 - strengths, 150–151
 - intra-individual variability, 3
 - lifespan perspective, 3–4
 - life stages, 96–97
 - models, as ways of seeing, 69–70
 - multidimensionality, 3
 - multidirectionality, 3
 - need for metamodel, 96–97
 - plasticity, 3
 - probabilistic epigenetic, 414–415
 - theories, 3–26
 - emerging phenomena, 8
 - fourth age, 8
 - illustrations, 9–23
 - new methods of measurement, 4–6
- Adult education, 115
 - defined, 478
 - goal, 478
 - immigration, 467–468
 - late life, 713–713
- Adulthood, first stage, *See* Emerging adulthood
- Adult learner, expertise, 484–516
 - history, 484
 - literature, 484
- Adult learning, 75–76, 767
 - aging curve, 472
 - British model, 467
 - defined, 75–76
 - history, 463–480
 - personality, 233–234
 - psychology of aging during the Second World War and afterwards, 463–476

- Adult learning (*continued*)
 research, 463–466
 role of American universities, 467–468
 transition to science of cognitive aging, 468–472
- Adult learning theory, 476–480
 history, 476–480
- Adult personality development theories, 222
- Advocacy groups, aging policy, 771
- Aesthetics as a way of knowing, 584
- Affective complexity, 14–15
 everyday problem solving, 540–541
- Age, 3–4
 cognitive performance, changes in inter-individual variability, 153–154
 digital divide, 626
 everyday problem solving, 533–534
 gendered adult life course, 380–381
 biological forces, 380–381
 historical forces, 381
 social forces, 381
 goal-striving, 559–566
 Theory of Mind, 712
 wisdom, relationship, 742–744
- Age of feeling in-between, 37
- Age of possibilities, 37
- Age periods, 18–29, 34, 35–59
- Age-related stereotypes, social cognition, 22–23
- Aging, *see also* Brain aging; Population aging
 apathy, 711
 cognitive training studies
 learning limits, 701–703
 learning potential, 701–703
 demographics, 764
 depression, 711
 neuroscience, 5–6
 activation imaging approach, 5
 correlational approach, 5
 neuropsychological approach, 5
 normal aging, 715–718
 prefrontal cortex, 717–718
 shift from formal to self-directed learning, 716–717
 shift in ways and means of learning, 715–718
 spaced retrieval, 718–722
- Aging agenda, social policy, 9
- Aging policy
 advocacy groups, 771
 context, 777–779
 dependency vs. productivity, 769
 educational policy as, 770–771
 productivity of older Americans, 763
- Agreeableness
 adjustment, 245–246
 maturity, 245–246
- Allocentrism, maturity, 150
- Alzheimer's disease, 703–707, 718–722
 Battery of Learning Potential for Assessing Dementia, 706
 characterized, 704
 demographics, 704
 episodic memory, 704, 710
 hippocampal volume, 706–706
 inductive reasoning, 705–706
 learning potential, 704–706
 medial temporal lobe, 710–711
 mild cognitive impairment syndrome, 706, 707–711
 Montessori methods, 722–725
 effects, 723–724
 group leaders, 724
 procedures, 722–723
 neurofibrillary tangles, 706–707
 Pittsburgh compound, 725
 preclinical
 changes, 707–711
 diagnosis, 725
 prefrontal cortex, 710–711
 prevalence, 764
 temporal lobe volume, 706–707
 Theory of Mind, 712
- American Association of Adult Education, 477
- Andragogy, 478
- Antidepressant medications, Attention-Deficit/Hyperactivity Disorder, 678, 681
- Apathy
 aging, 711
 learning, 711
- Apprenticeship, 467
- Argentina, emerging adulthood, 55
- Assimilation, 19, 103
- Associative mating, 285–286
- Attachment
 marital quality, 289–290
 marriage, 269
 adaptive processes, 286–289
 associative mating, 285–286
 changes in attachment functioning, 292–294
 compatibility of attachment representations, 290–292
 conflict management skills, 286–288
 research review, 285–294
 supportive behavior, 288–289
 theoretical associations, 283–284
- Attachment theory, 279–298
 Bowlby's ethological attachment theory, 279
 categories/prototypes vs. dimensions, 281–282
 constructs, 282
 patterns, 279–280
 romantic relationships, 281–282
 self-report questionnaires, 281, 282–283
- Attention-Deficit/Hyperactivity Disorder, 670–683
 Adderall, 678, 679
 adolescents, 670–671
 antidepressant medications, 678, 681
 assessment in adults, 682
 children, 670–671
 comorbidity, 673–676
 Cylert, 678, 679

- etiologic theories, 676–677
 existence in adults, 671–673
 gender, 672–673
 learning disability, distinguished, 670
 neuropsychological tasks, 677
 non-pharmacological interventions, 681–682
 non-stimulant medications, 678, 680
 outcome studies, 673–676
 physiological basis, 676–677
 prevalence, 671–673
 stimulant medications, 677–680, 678
 symptoms, 670
 treatment, 677–682
- Attitudes, learning, 580
- Autocasm, 89
- B**
- Baby Boomers, positive changes, 765
- Baltimore Longitudinal Study of Aging, 704, 705
- Battery of Learning Potential for Assessing
 Dementia, Alzheimer's disease, 706
- Beliefs
 Erikson, Erik, 88–89
 social cognition, 21
 social information processing, 21
- Berlin Aging Study, 702
- Big Five
 adjustment, 245–246
 maturity, 245–246
- Bioecological systems theory
 Bronfenbrenner, Urie, 81–85
 family relationships, 307–308
- Biogenetics, 96–97
- Biographical pacing, 391–392
- Blogs, 622
- Bowlby's ethological attachment theory, 279
- Brain activation, 15–16
 compensation-related utilization of neural
 circuits hypothesis (CRUNCH model), 15–16
 Hemispheric Asymmetry Reduction in Older
 Adults (HAROLD model), 15–16
- Brain aging
 gray matter, 698
 medial temporal lobe, 703
 normal cognitive aging, 696–703
 prefrontal cortex, 698, 700–701
 Seattle Longitudinal Study, 696–697, 697, 702
 structural changes, 698–699
 linking cognitive change, 699–701
 white matter lesions, 698–699
- Brain development, emerging adulthood, 40–41
- Bronfenbrenner, Urie, 79–80, 81–85
 bioecological systems theory, 81–85
 ecological framework, 81–85
 contexts for development, 81, 415
 developmental propositions, 83–84
 exosystem, 82, 82
 human development defined, 83
 interconnected systems, 83–84
 macrosystem, 82, 82
 mesosystem, 82–83
 microsystem, 82, 82
 nested structures, 81–85, 82
 non-familial contexts, 84–85
 reality relative, 81
 twins, 84
 unique phenomenological field, 81
 social policy, 79
- C**
- Career, 79
 emerging adulthood, 56–58
- Career change, 422–423
- Career development, 412–430, *see also* Work
 adequacy of stage models, 412–413
 biological and cognitive functioning impact,
 417–418, 418
 career change, 422–423
 career redefinition, 423–424
 developmental contextualism, 415
 developmental systems theory, 416–417
 employer-employee contract, 420–422
 future trends, 428–429
 increasing variability across life span, 418–419
 job loss, 422–423
 life-long job exploration, 423–424
 occupational success, 426–427
 pluralization, 412
 retirement, 424–426
 Selective Optimization with Compensation
 model, 417–420, 418–419
 unemployment, 422–423
 work-family balance, 426–427
 work-family conflict, 427
- Caregiving
 characterized, 311–312
 child with disability, 327–328
 generativity, relationship, 311–312
 importance, 312
 partner relationships, psychological well-being,
 319–320
 well-being, 327–328
 caregiving for parents, 331–333
 other kin, 335–336
- Change, 584
 growth models, 140
 comparison of analytic methods, 140
 multilevel, 140, 141–146, 159
 workplace, 580–581
- Childbearing, emerging adulthood, 53
- Childlessness, 321
- Children, 118–119
 Attention-Deficit/Hyperactivity Disorder,
 670–671
 disabled, 327–328
 poverty, 772–773
 same-sex parenting, 362–363
 well-being of parents, 321–322

- Chronic illness, 764
- Chronic life stressors, marital distress, 272, 273
- Citizenship, 640–642
 competing ideas, 641
- Civic engagement, *see* Civic participation
- Civic participation, 636–664
 cognitive development, 650–651
 community colleges, 648
 contexts for service, 658–662
 cultural capital, 643–664
 demographics, 639–640
 developmental influences, 648
 integration, 653–654
 discourse, 640–644
 education, 644–648
 grassroots organizations, 661–662
 higher education, 645–648
 individual motivations and goals, 641
 influences, 644
 moral development, 650–651
 outcomes, 658
 politics of, 639–640
 presidential mandates for service, 638–639
 psychological influences, 654–658
 psychosocial theories, 649–650
 religious organizations, 660–661
 service-learning, relationships, 636
 social capital, 643–644
 social class, 642–643
 social context, 638–640
 social identity, 651–657
 terminology, 636–638
 workplace, 659–660
- Civic Voluntarism model, 637
- Cognition
 emotion, 10–15, 23
 health, 16–17, 25
 cognitive plasticity, 17
 exercise, 17
 methodological advances, 17
 informal and incidental learning, 586–587
 neuroscience, 23–24
 white matter lesions, 699–700
- Cognitive aging, 5
 theories, neuro-scientific influence, 15–16
- Cognitive complexity
 ego level, 22
 mechanism, 22
- Cognitive development
 adaptive transformation, 103–130
 civic participation, 650–651
 dancing self metaphor, 104–105
 emerging adulthood, 40–43
 stages, 41
 felt connections, 104–105
 genes, 741
 neo-Piagetian perspectives, 103–130
 accommodation, 103
 assimilation, 103
 mechanisms, 103
 spirituality, 123–127
 points of interface, 125–126
 volunteering, 650–651
- Cognitive flexibility, 76
- Cognitive functioning
 environmental influences, 153
 genetic influences, 153
 plasticity, 17
- Cognitive mechanisms, social cognition, 20–21
- Cognitive performance, age, changes in inter-individual variability, 153–154
- Cognitive plasticity, 17
- Cognitive process, everyday problem solving, 536–539
- Cognitive science
 expertise, 505–506
 task analyses, 505–506
- Cognitive training studies
 aging
 learning limits, 701–703
 learning potential, 701–703
 plasticity, 701, 703
- Cohabitation, emerging adulthood, 52–53
- Cohort-sequential design, 138
- Collaboration
 everyday problem solving, 533, 536
 informal and incidental learning, 583–585, 587–588
 job security, 581
 physiological processes, 543–544
- Collective problem solving, 572
- College students, contemporary, 185
- College years
 adult development
 counteracting messages that oppress, 210–211
 mentors, 211
 promoting, 208–210
 epistemological development, development at the crossroads, 195–201
 ethnicity, 189–212
 gender, 189–212
 identity, 189–212
 interpersonal development at crossroads, 195–201
 intrapersonal development at crossroads, 195–201
 Learning Partnerships model, 208–210
 challenges, 211–212
 race, 189–212
 self-authorship
 adopting externally defined identities, 192–193
 adopting external truths, 191–192
 contextual dynamics, 189–190
 external formulas for beliefs, identity, relationships, 195
 externally defined relationships, 194–195
 from external to internal authorship, 190–206
 following external formulas, 190–195
 individual dynamics, 189–190
 internally defined beliefs, 195–197, 202–206

- internally defined identity, 197–199, 202–206
 - internally defined relationships, 199–201
 - internally generated beliefs, 206
 - internally generated identity, 206
 - internally generated relationships, 206
 - sexual orientation, 189–212
 - Coming out, 365, 366
 - Communications skills, marriage, 276
 - emotional content, 276
 - Community colleges, civic participation, 648
 - Community service, *See* Civic participation
 - Compensation, 18
 - Compensation-related utilization of neural circuits
 - hypothesis (CRUNCH model), brain activation, 15–16
 - Competence
 - emerging adulthood, 42
 - Model of Domain Learning, 502
 - Complex adult cognition, felt connection, 110–114, 111
 - Complex postformal thought
 - applications, 115–129
 - benefits, 118–119
 - children, 118–119
 - definition, 106–108
 - describes certain cognitive operations, 105
 - description, 106–108
 - development, 108–109
 - difficulties in studying, 127–128
 - distress and healing, 120–122
 - Eastern spirituality, 128–129
 - effects of individual's cognitive postformal skills, 117
 - emotions, 129
 - family relations, 116–129
 - felt connection, 111, 113–114
 - intimate relationship factors influencing
 - postformal thought development, 119–120
 - intimate relationships, 116–129
 - living in balance, 129
 - metatheory shift, 107
 - multiple causality, 108
 - multiple methods, 108
 - multiple solutions, 107
 - necessary skill, 126–127
 - new physics, 128–129
 - ordering of Piagetian formal operations, 109–110
 - paradox, 108
 - parameter setting, 107
 - pragmatism, 107–108
 - predictable couple problems when one logic
 - dominates, 117–118
 - principles, 109–110
 - problem definition, 107
 - process/product shift, 107
 - self-reference, 109
 - spirituality, 123–127
 - study, 122–123
 - testable hypotheses, 127–128
 - thinking operations, 107–108
 - Computers, 625–627
 - Conflict management
 - marriage, 276–277
 - skills, 286–288
 - Conscientiousness
 - adjustment, 245–246
 - maturity, 245–246
 - Conscientisation, 479
 - Conscious, Erikson, Erik, 88
 - Context
 - informal and incidental learning, 583–585, 588–591
 - late life, 714–715
 - Contextual model, 76–79
 - dominance, 76–79
 - Contrived tasks, expertise, 508–509
 - Control, 17–19, 25–26
 - Cooperative cognition, 126
 - Coping strategies
 - adjustment, 252–254
 - maturity, 252–254
 - Coping styles, 744–746
 - Correlation coefficient, 172
 - Counseling, personality, 233–234
 - Counselor, characteristics of effective, 479
 - Covariances
 - linear growth models, 142
 - quadratic growth models, 147–159
 - Covariates, quadratic growth models, 149
 - Creativity, 584
 - informal and incidental learning, 576
 - Critical reflectivity, informal and incidental learning, 576–577
 - Cross-sectional studies, 137
 - Cultural capital, civic participation, 643–644
 - Cultural issues, emerging adulthood, 54–56, 55
 - Cultural others, 80
 - Culture, Erikson, Erik, 85, 86–89
 - Cylert, Attention-Deficit/Hyperactivity Disorder, 678, 679
- D**
- Data collection
 - meta-analysis, 167–168
 - research synthesis, 167–168
 - Data evaluation
 - meta-analysis, 167–168
 - research synthesis, 167–168
 - Death of parents, 330–331
 - Dementia, *see also* Alzheimer's disease
 - prevalence, 764
 - syndromes, 703–707
 - Depression
 - aging, 711
 - learning, 711
 - Despair, 92–93
 - Development
 - integrated view, 186

- Development (*continued*)
- learning
 - frameworks, 184–185
 - intersections, 206–212
 - Developmental contextualism
 - assumptions, 415
 - Bronfenbrenner's ecological model of human development, 415
 - career development, 415
 - characterized, 414
 - Developmental nonequivalence, 139
 - Developmental research designs, growth models, 137–138
 - Developmental systems theory, 416–417
 - career development, 416
 - defines development, 416
 - six-foci model of personality, 225
 - Diffusion tensor imaging, 4Digital divide, 768
 - age, 626
 - Divorce
 - demographics, 270
 - emerging adulthood, 52–53
 - marital distress, 271
 - Document literacy, 607
 - Domain knowledge, 491–492
 - Double loop learning, 572
 - Downsizing, 580–581
- E**
- Early adulthood
 - religion, 438–440
 - spirituality, 438–440
 - Eastern spirituality, 128–129
 - Ecological framework, Bronfenbrenner, Urie, 81–85
