Preface 19

**Part 1. Animal hygiene for a more sustainable animal production**

The growing role of animal hygiene for sustainable husbandry systems 23

_Th. Blaha and J. Köfer_

Abstract 23

1. Introduction 23
2. The changes 25
3. Veterinary medicine 25
4. The consequences 26
5. Animal hygiene's contribution to animal health 27
6. Animal health and animal welfare improvements 27
7. Food safety at herd level (pre-harvest food safety) 28
8. Environmental protection and waste management 29
9. The most important principles and tools 29
10. Conclusion 31
References 32

The role of the European feed industry in a sustainable feed and food safety strategy 33

_M.J.M. Tielen_

Abstract 33

1. Introduction 34
2. Safe feed production: a daily challenge for the feed industry 34
3. Safety of genetically modified organisms (GMOs) in animal feed 40
4. Feed legislation embracing the overall feed chain 41
5. Compound feed producers response: the development of a European Feed Manufacturers Code (EFMC) 42
6. Concluding remarks 43
References 44

New trends in farm animal welfare: science values and practice 45

_J. Webster_

Abstract 45

1. Introduction 45
2. Sentience, welfare and wellbeing 46
3. Stress and suffering 46
4. Trends in animal welfare science 48
5. Ethics and values 50
6. Right action: promotion of animal welfare 51
7. Welfare-based quality assurance 52
References 54

**Sustainable animal production** 9
Effect of housing systems on dairy cow hygiene and udder health
K. O'Driscoll
Abstract
1. Introduction
2. Causative agents
3. Indicators of udder health status
4. Factors influencing udder health
5. Conclusion
References

Walkway floor design, feed stalls, claw lesions and locomotion in Swedish cubicle-housed dairy cattle
J. Hultgren, E. Telezhenko, M. Ventorp and C. Bergsten
Abstract
1. Introduction
2. Material and methods
3. Results
4. Discussion
5. Conclusions
Acknowledgements
References

Claw diseases as a factor for changes in dairy cows' behaviour and milk production
A. Pavlenko, L. Lidfors, C. Bergsten, A. Aland and D. Arney
Abstract
1. Introduction
2. Lameness
3. Digital dermatitis
4. Sole ulcer
5. Claw diseases, lameness and behaviour
6. Claw diseases, lameness and milk production
7. Control and prevention of claw diseases
8. Conclusions and recommendations
Acknowledgements
References

Herd health management and quality risk control on large dairy farms
J.P.T.M. Noordhuizen, J.S.C. Boersema and F. Cannas da Silva
Abstract
1. Introduction
2. Professionally executed HHM programmes
3. HACCP-based Quality Risk Control (QRC)
4. Discussion
References

New challenges to protect health and food quality when managing manures from intensive animal production
C.H. Burton
Abstract
1. Introduction
2. The consequences of intensive livestock farming
3. Treatment conditions to reduce pathogen numbers
4. Treatment techniques for the reduction of pathogen presence in livestock wastes
5. Processes based on the effect of raised temperatures
6. Conclusions
References

Health, fertility and welfare in genetically high producing dairy cows
P.A. Olnesøya
Abstract
1. Introduction
2. High milk production and its undesirable consequences
3. Practical implications
4. Conclusions
References

Environmental stress and reproduction in dairy cows
H. Dobson
Abstract
1. Introduction
2. The problems
3. Mechanism behind the problems
4. The solutions
References
Influence of milk feeding methods on the welfare of dairy calves
L. Lidfors, J. Loberg, P.P. Nielsen and M.B. Jensen

Abstract
1. The problem
2. Raising calves on the dam or foster cows
3. Rearing calves in small groups and feeding them via teat buckets
4. Rearing calves by feeding them via computer controlled milk feeders
5. Conclusions
Acknowledgements
References

Impact on and demands for health and welfare of range beef cattle in Scandinavian conditions
I. Ekesbo

Abstract
1. Introduction
2. Material and methods
3. Results and discussion
4. Conclusions
References

Part 3. Impact of the environment on pig behaviour, health and performance

Attempts to quantify the health status of pig herds: developing and validating a Herd Health Score (HHS)
C.-Ph. Dickhaus, D. Meemken and T. Blaha

Abstract
1. Objective
2. Material and methods
3. The composition of the Herd Health Score (HHS)
4. Results
5. Comparison of the HHS to the clinical investigation
6. Discussion
References

On-farm evaluation of animal welfare in weaner and fattening pig units based on critical control points
E. von Borell and D. Schäffer

Abstract
1. Introduction
2. Materials and methods
3. Results
4. Discussion
5. Conclusions
References

Sustainable animal production
Influence of milk feeding methods on the welfare of dairy calves
L. Lidsers, J. Loberg, P.P. Nielsen and M.B. Jensen
Abstract
1. The problem
2. Rearing calves on the dam or foster cows
3. Rearing calves in small groups and feeding them via teat buckets
4. Rearing calves by feeding them via computer controlled milk feeders
5. Conclusions
Acknowledgements

On-farm evaluation of animal welfare in weaner and fattening pig units based on critical control points
E. von Borell and D. Schaffner
Abstract
1. Introduction
2. Materials and methods
3. Results
4. Discussion
5. Conclusions
References

Reproductive disorders in pigs: a review on the crucial role of the environment
F. Madec
Abstract
1. Introduction
2. The major problems encountered in daily practice
3. The crucial role of the environment in maintaining a healthy urogenital tract and sow performance
4. From academic knowledge to practice: adopt a rationale
5. Conclusion
References

An overview of the impact of the environment on enzootic respiratory diseases in pigs
C. Fablet
Abstract
1. Introduction
2. Environmental factors involved in herd contamination
3. Herd factors suspected to promote disease persistence
4. Conclusion and outlook
References

A review of the effect of feed-borne mycotoxins on pig health and reproduction
T. Smith and G. Diaz-Llano
Abstract
1. Definition and classification of mycotoxins
2. Natural distribution of mycotoxins
3. Hepatic mycotoxicoses
4. Renal mycotoxicoses
5. Pulmonary mycotoxicoses
6. Mycotoxins that affect pig immunity
7. Effects of feed-borne mycotoxins on pig reproduction
8. Summary
References

Impact of the diet on digestive disorders of pigs, with special emphasis on proliferative enteropathy and swine dysentery
J.R. Pluske and D.J. Hampson
Abstract
1. Introduction
2. Proliferative enteropathy (PE)
3. Swine dysentery
4. Conclusions

Part 4. Impact of the environment on poultry behaviour, health and performance

Laying hens in aviaries: development, legal and hygienic aspects

I. Hartung, A. Briese and A.C. Springorum

Abstract

1. Introduction
2. Development and legal aspects
3. Characteristics of aviaries
4. Animal welfare, health and performance
5. Hygiene aspects
6. Conclusions

References

Challenges of the new requirements for welfare of laying hens housed in cages

V. Michel and M. Guinebretière

Abstract

1. Introduction
2. Changes in regulations
3. Inter-relationships between housing, animal welfare, health and performances in furnished cages
4. Housing systems of laying hens: position of the different producer countries and egg trade
5. Conclusions and outlook

Controlling the concentrations of airborne particles in broiler buildings

T.M. Banhazi, E. Currie, M. Quartararo and A.J.A. Aarnink

Abstract

1. Introduction
2. Effects of airborne pollutants on farm workers, livestock and the environment
3. General comments on reduction methods
4. Conclusions

References
Controlling the concentrations of airborne pollutants in piggery buildings  
T.M. Banhazi, E. Currie, S. Reid, I-B. Lee and A.J.A. Aarnink  
Abstract  
1. Introduction  
2. Effects of airborne pollutants on farm workers, livestock and the environment  
3. Generally encountered indoor concentrations and suggested maximum limits  
4. General comments on reduction methods  
5. Proactive reduction methods: minimising the generation of airborne pollutants  
6. Reactive reduction methods: dealing with existing problems  
7. Conclusions  
Acknowledgements  
References  

4. Proactive reduction methods: minimising the generation of airborne particles 351  
5. Reactive reduction methods: dealing with existing problems 354

The effect of the feed on the host-microflora interactions in poultry: an overview 365  
C. Burel and C. Valat  
Abstract  
1. Introduction 365  
2. Description and location of the GI normal microflora of birds 366  
3. Gut functions 368  
4. Gut microflora regulation 370  
5. Adverse microorganisms potentially present in the GI tract: enteric pathogens 370  
6. Improve microflora balance: nutritional approaches to influence different bacterial control mechanisms 371  
7. Competitive exclusion and probiotics 371  
8. Prebiotics 373  
9. Organic acids 374  
10. Diet formulation, feed preparation 374  
11. Exogenous enzymes 375  
12. Nutritional influence on host-microflora interactions 376  
13. Carbohydrates 376  
14. Proteins 377  
15. Lipids 377  
16. Energy 377  
17. Vitamins and minerals 378  
18. Conclusion 378  
References 379  

Effect of lactic acid bacteria on broilers: from the farm to the processing plant 385  
Abstract  
1. Introduction 385  
2. Materials and methods 386  
3. Results 388  
4. Discussion 391

Challenges of the new requirements for welfare of laying hens housed in cages 329  
V. Michel and M. Guinébretière  
Abstract  
1. Introduction 329  
2. Changes in regulations 330  
3. Inter-relationships between housing, animal welfare, health and performances in furnished cages 332  
4. Housing systems of laying hens: position of the different producer countries and egg trade 338  
5. Conclusions and outlook 340  
References 341  

Controlling the concentrations of airborne particles in broiler buildings 347  
T.M. Banhazi, E. Currie, M. Quar touring and A.J.A. Aarnink  
Abstract  
1. Introduction 347  
2. Effects of airborne pollutants on farm workers, livestock and the environment 348  
3. General comments on reduction methods 350  

Sustainable animal production  
Sustainable animal production 15
Health and welfare in Swedish game bird rearing
S. Wiberg and S. Gunnarsson

Abstract
1. Introduction
2. Material and methods
3. Results
4. Discussion
5. Conclusion
Acknowledgements
References

Part 5. The lessons for the future

Precision livestock farming for animal health, welfare and production
C.M. Wathes

Abstract
1. Introduction
2. The basic concepts of PLF
3. Lessons to be learnt from current applications of PLF
4. The electronic stockman: an engineer's pipedream or a genuine prospect?
5. The prospects for PLF - the need for automatic monitoring in livestock farming
6. Conclusions
References

Development of a risk assessment methodology for animal welfare in EFSA's scientific opinions
D. Candiani, O. Ribò, S. Barbieri, A. Afonso, T. Grudnik, F. Berthe and J. Serratosa

Abstract
1. Introduction
2. State of play of risk assessment in animal welfare
3. EFSA's methodology on the risk assessment in animal welfare
4. Discussion
5. Conclusions
References

A method for construction and evaluation of scenarios for sustainable animal production
S. Gunnarsson, U. Sonesson, T. Nybrant, S. Stern and I. Öhman

Abstract
1. Introduction
2. Material and methods
