PART 1 - GAS WELDING

Understand Welding and Cutting
Oxyacetylene Welding
Equipment
Preparing To Weld
Setting Up Cylinders
Setting Up Regulators
Setting Up Torch
Operating The Torch
How To Weld
Stopping Work
Backfire and Flashback
Oxyhydrogen Welding
Airacetylene Welding

PART 2 - ARC WELDING

Introduction
Equipment
Preparing To Weld
Welding Positions
Types Of Joints
Starting The Arc
Setting The Current
Length Of Arc
Travel Speed
Forming The Crater
Electrode Positions
Types Of Electrodes
Selecting The Electrode
Arc Welding Difficulties
Carbon-Arc Welding
Gas Shielded-Arc Welding

PART 3 - OXYGEN AND ARC CUTTING

Introduction
Oxygen Cutting
Setting Up Cutting Torch
Operating The Cutting Torch
How To Cut
How To Pierce
Stopping Work
Other Flame Cutting Operations
Powder-Cutting
Arc Cutting
Air-Carbon Arc Gouging and Cutting
Air Gouging Safety
Plasma Arc Cutting

PART 4 - BRAZING AND SOLDERING

Introduction
Brazing
Braze Welding
Soldering

PART 5 - METAL SURFACING

Introduction
Hard Surfacing
Surface With Oxyacetylene
Surface With Arc
Metalizing

PART 6 - DESIGN OF WELDED UNITS

Introduction
Design Factors
Design Of Joints
Locating The Welds
Weld Size
Defects In Welds

PART 7 - PROPERTIES OF METALS

Introduction
Ferrous and Nonferrous Metals
Melting Points Of Metals
Iron and Steel
Alloy Metals
Heating Of Metals During Welding
Identifying Irons and Steels
Heat Treatment Of Metals

PART 8 - WELDING SAFETY

Introduction
Protective Equipment
Ventilation
Working On Tanks and Containers
Fire Prevention
Oxyacetylene Safety
Arc Welding Safety
Safety In Cutting

DEFINITIONS OF TERMS AND SYMBOLS
