Experiment

137 Some measurements using a cathoderay tube

138 Characteristics of a p-n-p transistor

Modern Physics

- 139 Electronic charge e by Millikan's experiment 238
- 140 Specific charge (e/m_e) for electrons using the magnetron method 242
- 141 Estimation of a value of Planck's constant from measurements on photoelectric emission
- 142 Characteristics of a Geiger-Muller tube
- 143 Radiation hazards-dosimetry
- 144 Counting and monitoring exercises using a Geiger-Muller tube and scaler
- 145 Dead time of a Geiger-Muller tube
- 146 Efficiency of a Geiger-Muller tube for β counting 256
- 147 Relative efficiency of a Geiger-Muller tube for β/γ counting 258 260
- **148** Absorption of β -rays
- 149 Attenuation of γ -rays by matter
- 150 Verification of inverse square law for 264 y-rays
- 151 Experiments with a pulse electroscope 266 152 Determination of the range of a-
- particles in air (two methods) 269
- 153 Absorption of α -rays by matter 271
- 154 Measurement of the half-life of thorium emanation (thoron) 273

LIST OF ADDITIONAL EXPERIMENTS DESCRIBED IN THE TEXT

Mechanics and Properties of Matter

- I 'g' by vertical oscillations of a loaded test-tube
- 2 Comparison of densities of two liquids using a loaded test-tube
- 3 Empirical formula for a simple pendulum
- 4 Moment of inertia of a rigid body by measurement of the length of the simple equivalent pendulum
- 5 Comparison of moments of inertia using a bifilar suspension
- 6 Moment of inertia of a flywheel by an oscillation method

13

15

21

23

- 7 Comparison of moments of inertia by torsional oscillations of a wire
- 8 Coefficient of rigidity using a spiral spring
- Variation of the surface tension of a liquid with temperature, and the determination of the molecular aggregation
- 10 Ferguson's method for the surface tension of a small quantity of liquid
- II Comparison of the surface tensions of two liquids by weighing drops
- 12 Interfacial surface tension of two liquids by the drop-weight method

Light

- 13 Reflecting power of a surface 14 Refractive index of a lens by locating a flare spot 15 Focal length of a concave lens using an auxiliary convex lens in contact 16 Determination of the constants of Cauchy's formula, and the evaluation of the resolving power of a prism 17 Dispersive power of a prism 18 Refractive index of a liquid by Newton's rings 19 End correction of a resonance tube 20 Verification of the laws of vibration of a stretched string 21 Density of a heavy weight using a sonometer 22 Young's modulus of a rod by Kundt's tube 23 Coefficient of adiabatic elasticity by Kundt's tube 24 Coefficient of expansion of a powder (problem) 25 Verification of Newton's law of cooling 26 Saturated vapour pressure of water vapour using a small flask 27 Comparison of thermal conductivities of bad conductors by Lees' disc method
- 28 Thermal conductivity of rubber

Electricity and Modern Physics

- 29 Recovery rate of a polarized Leclanché
- 30 Melting point of a solid using a thermocouple
