Construction Economics: A New Approach

	<i>page</i>
Chapter 1: An Introduction to the Basic Concepts	1
Reading 1	23
Part A Effective Use of Resources	27
Chapter 2: Economic Systems for Resource Allocation	29
Chapter 3: The Market Mechanism	41
Chapter 4: The Theory of Demand	53
Chapter 5: The Theory of Supply	65
Chapter 6: Clients and Contractors	79
Chapter 7: Costs of the Construction Firm	89
Chapter 8: Types of Market Structure in the Construction Industry	115
Reading 2	127
Reading 3	129
Part B Effective Protection of the Environment	131
Chapter 9: Markets for Green Buildings and Infrastructure	133
Chapter 10: Market Failures and Government Remedies	147
Chapter 11: Environmental Economics	161
Reading 4	177
Part C Economic Growth that Meets the Needs of Everyone	179
Chapter 12: Managing the Macroeconomy	181
Chapter 13: The Economy and Construction: Measurement and Manipulation	193
Chapter 14: The Business Case: Inflation and Expectations	213
Reading 5	229
Chapter 15: Sustainable Construction	231
Reading 6	249
Glossary	251
