REPRODUCTION IN
FARM ANIMALS
7th Edition

Edited by
B. Hafez/E.S.E. Hafez

Co-Directors
Reproductive Health Center
IVF/Andrology International
Edwards Island, South Carolina, USA

Blackwell
Publishing
CONTENTS

CHAPTER 1
Anatomy of Male Reproduction 3
E.S.E. Hafez

CHAPTER 2
Anatomy of Female Reproduction 13
B. Hafez and E.S.E. Hafez

CHAPTER 3
Hormones, Growth Factors, and Reproduction 33
E.S.E. Hafez, M.R. Jainudeen, and Y. Rosnina

CHAPTER 4
Reproductive Cycles 55
E.S.E. Hafez and B. Hafez

CHAPTER 5
Folliculogenesis, Egg Maturation, and Ovulation 68
E.S.E. Hafez and B. Hafez

CHAPTER 6
Transport and Survival of Gametes 82
E.S.E. Hafez and B. Hafez

CHAPTER 7
Spermatozoa and Seminal Plasma 96
D.L. Garner and E.S.E. Hafez

CHAPTER 8
Fertilization and Cleavage 110
E.S.E. Hafez and B. Hafez

CHAPTER 9
Implantation 126
R.D. Geisert and J.R. Malayer

CHAPTER 10
Gestation, Prenatal Physiology, and Parturition 140
M.R. Jainudeen and E.S.E. Hafez

PART III
Reproductive Cycles 157

CHAPTER 11
Cattle and Buffalo 159
M.R. Jainudeen and E.S.E. Hafez

CHAPTER 12
Sheep and Goats 172
M.R. Jainudeen, H. Wahid, and E.S.E. Hafez

CHAPTER 13
Pigs 182
L.L. Anderson

CHAPTER 14
Horses 192
E.S.E. Hafez and B. Hafez

CHAPTER 15
Llamas and Alpacas 218
J.B. Sumar
CHAPTER 16
Reproduction in Poultry: Male and Female 237
D.P. Froman, J.D. Kirby, and J.A. Proudman

PART IV
Reproductive Failure 259

CHAPTER 17
Reproductive Failure in Females 261
M.R. Jainudeen and E.S.E. Hafez

CHAPTER 18
Reproductive Failure in Males 279
M.R. Jainudeen and B. Hafez

PART V
Physiopathologic Mechanisms 291

CHAPTER 19
Reproductive Behavior 293
B. Hafez and E.S.E. Hafez

CHAPTER 20
Genetics of Reproductive Failure 307
Y. Rosnina, M.R. Jainudeen, and E.S.E. Hafez

CHAPTER 21
Genetic Engineering of Farm Mammals 318
C.A. Pinkert

CHAPTER 22
Pharmacotoxicologic Factors and Reproduction 331
A.E. Archibong and S.E. Abdelgadir

CHAPTER 23
Immunology of Reproduction 341
P.J. Hansen

CHAPTER 24
Molecular Biology of Reproduction 354
R. Juneja and S.S. Koide

PART VI
Assisted Reproductive Technology 363

CHAPTER 25
Semen Evaluation 365

CHAPTER 26
Artificial Insemination 376

CHAPTER 27
X and Y Chromosome-Bearing Spermatozoa 390
E.S.E. Hafez and B. Hafez

CHAPTER 28
Pregnancy Diagnosis 395
M.R. Jainudeen and E.S.E. Hafez

CHAPTER 29
Ovulation Induction, Embryo Production and Transfer 405
M.R. Jainudeen, H. Wahid, and E.S.E. Hafez

CHAPTER 30
Preservation and Cryopreservation of Gametes and Embryos 431
E.S.E. Hafez

CHAPTER 31
Micromanipulation of Gametes and Embryos: In Vitro Fertilization and Embryo Transfer (IVF/ET) 443
B. Hafez and E.S.E. Hafez
Chapter 16
Reproduction in Poultry: Male and Female 237
D.P. Froman, J.D. Kirby, and J.A. Proudford

Part IV
Reproductive Failure 259
Chapter 17
Reproductive Failure in Females 261
M.I. Jaimudeen and E.S.E. Hafez

Chapter 18
Reproductive Failure in Males 279
M.I. Jaimudeen and B. Hafez

Part V
Physiopathologic Mechanisms 291
Chapter 19
Reproductive Behavior 293
B. Hafez and E.S.E. Hafez

Chapter 20
Genetics of Reproductive Failure 307
Y. Rosina, M.I. Jaimudeen, and E.S.E. Hafez

Chapter 21
Genetic Engineering of Farm Mammals 318
C.A. Pinkert

Chapter 22
Pharmacotoxicologic Factors and Reproduction 331
A.E. Archibong and S.E. Abdelgadir

Chapter 23
Immunology of Reproduction 341
P.J. Hansen

Chapter 24
Molecular Biology of Reproduction 354
R. Junge and S.S. Koide

Part VI
Assisted Reproductive Technology 363
Chapter 25
Semen Evaluation 365
R.L. Ay, M.R. Daily, B.A. Dixon, R.W. Lane,
C.C. Love, D.D. Varner, B. Hafez, and M.E. Bellin

Chapter 26
Artificial Insemination 376
R.L. Ay, M.R. Daily, B.A. Dixon, R.W. Lane,
C.C. Love, D.D. Varner, B. Hafez, and M.E. Bellin

Chapter 27
X and Y Chromosome-Bearing Spermatozoa 390
E.S.E. Hafez and B. Hafez

Chapter 28
Pregnancy Diagnosis 395
M.I. Jaimudeen and E.S.E. Hafez

Chapter 29
Ovulation Induction, Embryo Production and Transfer 405
M.I. Jaimudeen, H. Wahid, and E.S.E. Hafez

Chapter 30
Preservation and Cryopreservation of Gametes
and Embryos 431
E.S.E. Hafez

Chapter 31
Micromanipulation of Gametes and Embryos:
In Vitro Fertilization and Embryo Transfer (IVF/ET) 443
B. Hafez and E.S.E. Hafez

Glossary 467
Glossary of Common Abbreviations 475
Appendices 477

Appendix I
Chromosome Numbers of Bovinae, Equinae,
and Caprinae Species 477

Appendix II
Chromosome Numbers and Reproductive Ability
in Equine, Bovine, and Caprine Hybrids 478

Appendix III
Preparation of Physiologic Solutions 479

Appendix IV
Technique for Determining Spermatozoal Concentration Using a Hemacytometer 481

Appendix V
Preparation of Sperm Stains 482

Appendix VI
Preparation of Trypsin for Zona-Free Hamster Ova 485

Appendix VII
Evaluation of Chromosomes of Ova 485

Appendix VIII
Book/IVF Companies 486

Appendix IX
In Vitro Fertilization by Microinjection 490

Index 497
Abortion, 269 (see also under specific animal)
   infectious causes of, 270-274
   in cattle, 270-271, 271t
   in horses, 273, 273t
   in sheep and goat, 271, 273t, 273
   in swine, 273
   noninfectious causes of, 267-270, 270t
   in cattle, 270-271
   in horse, 273
   in sheep and goat, 271, 273
   in swine, 273
   plant toxins causing, 332-333, 334t, 336

Acquired immunity, 343

Acrosin, 113

Acrosome, 96
   knobbed, 312
   reaction of, in fertilization, 113t, 116
   sequence of events in, 120

Activins, 41t, 43
   physiologic action of, 44, 48, 49

Adenohypophysis, hormones of, 38-39

Adrenocorticotropic hormone (ACTH), 34, 38

Aging, and reproductive cycles, 65-66

Agricultural pesticides
   and female reproduction, 337t, 338
   and male reproduction, 336-338

Alfatoxins, 335

Alpacas, 218
   anatomy of, reproductive female, 218
   male, 228, 229
   artificial insemination of, 232
   comparison of female reproductive tracts in llamas and, 219t
   corpus luteum function in, 222-223
   embryo transfer in, 232-233
   follicular development in, 219-221
   in vitro fertilization in, 233
   induced abortion in, 225
   ovulation in, 221-222
   pregnancy in, 223
   diagnosis of, 224-225
   progesterone levels in female, after mating, 227t
   puberty in
   female, 218
   male, 228-229
   pregnancy in, 235
   reproductive capacity of, 229-230
   reproductive failure in, 226, 231
   abortion as, 227-228
   congenital and acquired defects as, 226, 231
   delayed testicular descent as, 231
   embryo loss as, 227
   endometritis as, 226
   fetal loss as, 227
   immunosuppression as, 227
   pregnancy as, 227
   proestrus as, 227
   semen collection in, 229-230, 230t
   semen production and characteristics in, 230-231
   sexual behavior of
   female, 223
   male, 229
   sexual season of
   female, 218-219
   male, 229
   testosterone levels in, during year, 230t
   twinning in, 228
   uterine function in, 222-223
   vagina in, 233t, 237t

Anaphase lag, 309

Anatomy, of reproduction
   female, 13, 14-15
   (see also under specific animal)
   cervix uteri of, 24-27
   comparative, 22
   embryonic differentiation of, 13, 14
   functional histology of, 16t
   genitalia of, external, 28
   immune system in, components of, 345-346
   infection of, and ciliated cell morphology, 19
   ovary in, 12-13
   ovulation in, 17-21
   uterus in, 21-24
   vagina in, 27-28
   male, 3 (see also under specific animal)
   accessory glands of, 8-10
   comparative anatomy of, 8-9, 9
   function of, 9-10
   and descent of testes, 4-5
   development of, 3-6, 5t
   embryonic differentiation of, 14
   epididymis and ducus deferens in, 7
   penis and prepuce in, 10-11
   testes and scrotum in, 5-7
   Androgen bound protein (ABP), 48, 104
   Androgometabolites, 122
   Androgenesis, 42-43, 105
   Anestrus, 261-262
   causes of, 263
   Anosmia, 309
   Aneurysm rings, 23
   Anovulatory estrus, 263
   Antibodies, 342, 344
   Antigen(s), 342
   antibodies, 342
   antigen(s), 342
   antigenicity, of sperm, 109
   Antisperm antibody assay (AAA), 399, 402
   Artificial insemination (AI), 376
   in alpacas, 232
   in cattle, 377-380
   detection of estrus, and insemination procedures in, 380t
   in horses, 382-385
   in llamas, 232
   semen collection for, 376-377 (see also under specific animal)
   artificial vagina preparation in, 377t
   frequency of, 377t
   in sheep, 385-388
   in swine, 380-382
   Artificial vagina, for semen collection
   from bulls, 377-378, 377t, 379
   from pigs, 377t, 380
   from rams, 377t, 381
   from stallions, 377t, 382-383, 383
   models and sources of, 212, 382-383
   Assisted reproduction, 209 (see also Artificial insemination (AI); Embryo(s); Assisted reproductive technology (see also Cryopreservation; DNA microinjection; Embryonic stem cell technology; In vitro embryo production [IVP]; Intracytoplasmic sperm injection [ICSI]; Micromanipulation; Air filtration for, 452
   culture media used in, 451, 457-458
   culture methods of, 457-458
   macromolecular supplementation in, 461-462
   instrumentation used in equipment and, 461, 462, 463
   supplies and, 452, 455t
INDEX

Assisted reproduction technology—
Continued

technique(s) used in, 448t, 455t
follicle puncture, aspiration equipment for, 450
immunobead test, 455
in vitro fertilization, 455t
intracytoplasmic sperm injection, 440–450
ova manipulation, 445t
sperm cell concentration, 459
spem preparation, 455t
water quality for, 452

Autoerotic behavior, 301
Autoimmunity, to sperm, 109
B lymphocytes, 341
Barker syndrome, in horses, 210
Behavior
Basophils, 345
Blastocyst
Bioreactors, domestic animal, 325
Blastokinin, 21
Blastomeres, 117-118
Blood-testis barrier, 102
Bock's test (see Gross)
Buffalo, 167
bulls
breeding of, 168
ejaculate of, 168
germinal and sexual behavior of, 168
embryo transfer technology for, 452–456
early cycle in, 167–168
estrus in, detection of, 163, 168
gestation and parturition in, 168
postpartum ovarian activity in, 169, 169n
puerperium in, 167
pseudopregnancy in, 168–169
reproductive characteristics of females, 163
reproductive performance of females, 169
improvement of, 170
superovulation protocols for, 433t
Bullozerosal glands, compressive anatomy of, 5
Bull(s)
Buck(s)
Buffalo, 167
Bulbourethral glands, comparative anatomy of, 24
Bull(s)
Breeding
Breeding season, 62
water quality for, 452
locations of, in reproductive tract, maternal, 301–302
in farm animals, 294
heonatal, 301–302
reproductive, 293–301
bisection of, by micromanipulation, and conceptus expansion, 129–131
development of, 123–124, 126
Blasocyst hatching, 123, 126
assisted, 449t
micromanipulation of, 449t
Blasocystin, 21
Blastocenters, 117–118
Blood-testis barrier, 102
autoimmune response and, 287
myoid layer of, 103
Sertoli cell junctions of, 103–104
Bos (see Pig)
BFSF (see Protein B, pregnancy)
Breeding (see under specific animal)
Breeding season, 62 (see also under specific animal)
endocrine and neuroendocrine physiology of, 65
factor regulating, 65
in males, 11t, 64, 109
nature of, 62–65
photoperiodism and influence on, 63–64
temperature and influence on, 63–64
Buck(s) (see Gross)
Buffalo, 167
bulls
breeding of, 168
ejaculate of, 168
germinal and sexual behavior of, 168
embryo transfer technology for, 452–456
early cycle in, 167–168
estrus in, detection of, 163, 168
gestation and parturition in, 168
postpartum ovarian activity in, 169, 169n
puerperium in, 167
pseudopregnancy in, 168–169
reproductive characteristics of females, 163
reproductive performance of females, 169
improvement of, 170
superovulation protocols for, 433t
Bullozerosal glands, compressive anatomy of, 5
Bull(s)
Buck(s)
Buffalo, 167
Bulbourethral glands, comparative anatomy of, 24
Bull(s)
Breeding
Breeding season, 62
water quality for, 452
locations of, in reproductive tract, maternal, 301–302
in farm animals, 294
heonatal, 301–302
reproductive, 293–301
bisection of, by micromanipulation, and conceptus expansion, 129–131
development of, 123–124, 126
Blasocyst hatching, 123, 126
assisted, 449t
micromanipulation of, 449t
Blasocystin, 21
Blastocenters, 117–118
Blood-testis barrier, 102
autoimmune response and, 287
myoid layer of, 103
Sertoli cell junctions of, 103–104
Bos (see Pig)
BFSF (see Protein B, pregnancy)
Breeding (see under specific animal)
Breeding season, 62 (see also under specific animal)
endocrine and neuroendocrine physiology of, 65
factor regulating, 65
in males, 11t, 64, 109
nature of, 62–65
photoperiodism and influence on, 63–64
temperature and influence on, 63–64
Buck(s) (see Gross)
Buffalo, 167
bulls
breeding of, 168
ejaculate of, 168
germinal and sexual behavior of, 168
embryo transfer technology for, 452–456
early cycle in, 167–168
estrus in, detection of, 163, 168
gestation and parturition in, 168
postpartum ovarian activity in, 169, 169n
puerperium in, 167
pseudopregnancy in, 168–169
reproductive characteristics of females, 163
reproductive performance of females, 169
improvement of, 170
superovulation protocols for, 433t
Bullozerosal glands, compressive anatomy of, 5
Bull(s)
Buck(s)
Buffalo, 167
Bulbourethral glands, comparative anatomy of, 24
Bull(s)
Gametes
freemartinism, 316
follistatin, 41, 44
folliculogenesis, 68, 70
follicle stimulating hormone (FSH), 34, 38, 39
follicle puncture technique, 458
follicle(s), ovarian, 16
foal heat, 207
flushing, 179, 180
fibroblast growth factor (FGF), 49, 50
Flehmen reaction, 294
fluorescence technique, for evaluation
xerus, 147.
hal mummification, 261, 273-274
SI attachment in, 112-113
events of, 114, 115, 117, 121
penetration of zona pellucida in,
implantation unit, 146
circulation of, 148, 248
fluid of, 69, 72
in the ovary, 72
and ovulation, 74-80
histology and structures of, 69
primordial, 69
secondary, 69
steroidogenic activity of, 72-73, 75
and corpus luteum, 75
apex of, at ovulation, 79
nutrition of, 147
fluids of, 148-149
atresia of, in ovulation, 74-75
and response to birth, 151-153
metabolism of, 147
spermatocytes, 34, 38, 39
specific animal
sperm, 38, 39
physiology of, 74
follicular phase of, 73
anomalies of, 75
endocrinology of, 72-73
luteal phase of, 73
function of, 69, 72, 72
expression in reproduction, 356
biochemical composition of, 69, 72
growth of, 69
female, 172
function of, 69, 72, 72
ovulation, 74-75
and corpus luteum, 75
fluid of, 69, 69
biomolecular composition of, 69, 72

generation of, 319
renovirus-mediated, 323
gonadal development
abnormal karyotypes in, 308-312
chromosomes in, 307
construction of, used in genetic engineering; Molecular biology
future directions in, 328-329
transgenes and modifications in,
analysis of manipulations in, 327-328
manipulation in, 447
development of, 318-319
molecular biology of, 354
expression in reproduction, 356
germ-line competency, 322-323
molecular biology of, 354
gonad(s), 34, 35
gonadotropin releasing hormone (GnRH), 38, 38
episodic ovarian ablation and, 106
echoequine gonadotropin (ECG), 44, 45, 50,
diagnosis of pregnancy, 403
in estrogen, 144
in prostaglandins, 231
estradiol, 41
estrone, 41, 42, 43, 44
in estrogen, 142
plants, 41
estrogerone, 41
in diagnosis of pregnancy, 395
estrone, 34, 39 (see also estrogen, specific animal)
endocrine regulation of, 46-47, 59-61
resumption of, in pregnancy, 154
synchronization of, 408-410
protocols for, 407-409
mammals, 37-39, 88-89
Estrus (see also Estrus cycle, specific)
steroid abnormalities, of, 261-262, 263
during of, 286
infection of, 40
progestation, and ovulation, 61-62
Ewes (see Sheep)
estrus
attachment in, 112
in female, 116
in males, 115, 117, 121
penetration of zona pellucida in,
physiological events in, 113-114
physiology of, 114, 115
syngamy in, 116
mammalian hybrids, 316-317
in female, 315
in males, 315
chromosomal abnormalities in, 466
in spermatogenesis, 315
in sperm, 316
in testes, 315
in spermatogenesis, 315
in testes, 315
Microinjection, of genes
Metritis, 277.
Melatonin, 38t, 39-40
Micromanipulation, 443-445
Maturation media, bovine serum for, 447t
Meiosis, chromosome arrangement in,
Mating, 295
Mares
Mast cells, 345
Maternal recognition of pregnancy
Masturbation, 301
Luteinizing hormone
Luteal phase, hormonal manipulation of,
Lochia, 153
Llamas—Continued
504
gene transfer in, 447t
formation of, and diurnal rhythms, 40
of gametes, 109, 443-445, 448t, 452
in fertilization, 449-450, 449t, 454
in capacitation of sperm, 449t
in hatching and, 449t
in nuclear transfer, factors involved
in, 447t
in zona pellucida, 445-447
in ovulation, 40
inhibitions of, 40
Maceration, 261
Major histocompatibility complex
Macrophages, 342
Luteolysis, 17
Molecular biology (see also Genetics)
of fertilization and implantation,
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
Luteal phase, hormonal manipulation of,
Lochia, 153
Luteinizing hormone, 39-40
