About the authors	x
Foreword by Janet Moyles	xi
Key for icons	xiii
Introduction	1
PART 1 PARADIGMS AND PRINCIPLES	7
1 **Positivist research**	9
Finding out about the world around us	9
What do we mean by a 'paradigm'?	10
The meaning and origins of positivism	11
The scientific method	12
Positivism and the quantitative methodological approach	14
Experimental method	15
Correlational method	18
Validity and reliability	19
The possibilities and limitations of positivist research	20
2 **Interpretivism and post-structuralism**	22
What do we mean by interpretivism?	22
How does interpretivism relate to early childhood research?	26
Qualitative research approaches and methods	29
Combining qualitative and quantitative research methods	30
3 **Ethics**	33
What do we mean by 'ethics'?	33
Why is a consideration of ethics important in early childhood research?	36
What does 'informed consent' mean in the context of early childhood research?	37
Ethical considerations throughout the research process	40
Ethical guidelines and legal considerations	43
4 **Listening to young children**	46
The development of interest in listening to young children	46
Ethical issues when involving young children in research	50
The child as researcher	52

PART 2 APPROACHES TO RESEARCH 55

5 **Surveys** 57
What is a survey? 57
Why are surveys used? 58
Designing a survey 61
The use of surveys in early childhood 65

6 **Ethnography** 69
What do we mean by 'ethnography'? 69
Ethnography and early childhood research 72
Carrying out ethnographic fieldwork 74
The possibilities and limitations of ethnographic research 78

7 **Case studies** 81
What is a case study? 81
Historical background 82
Case study design 83
Methods that can be used in case studies 86
Possibilities and limitations of using case studies 87

8 **Action research** 90
What is action research? 90
Who does action research? The practioner-researcher 93
The action research cycle 95
Methods used in action research 97
The possibilities and limitations of action research 98

PART 3 METHODS 101

9 **Observation** 103
Historical overview 103
When is it appropriate to use observation in research? 105
Types of observation 106
Recording information 114

10 **Interviews** 118
What is an interview? 118
When to use interviews 119
Types of interview 120
Carrying out and recording interviews 128

11 **Questionnaires** 132
What is a questionnaire? 132
Why are questionnaires used in research? 132

Types of question used in questionnaire design 134
Putting a questionnaire together 140
Administering a questionnaire 145
Possibilities and limitations of questionnaires 146

12 Using documents and other visual 'texts' 148
What is a 'document'? 148
Why might we use documents in research? 153
How might we evaluate documentary sources? 154

13 Journaling as a research tool 158
The self as a legitimate subject for study 158
What do we mean by a 'journal'? 159
Why use journaling as a research tool? 160
Tools to help develop reflective journal writing 164
The possibilities and limitations of using journaling as a research tool 166

14 Creative methods for listening to children in research 169
Listening to young children in research: developing an inclusive approach 169
Photography 171
Drawings 173
Play as a research *strategy* 176
Story-telling and narrative approaches 177
The Mosaic Approach 177

PART 4 CARRYING OUT A RESEARCH PROJECT 181

15 Research design 183
The stages of planning a research project 183
Developing an area of investigation, research question or a hypothesis 184
Choosing a research design 189
Choosing appropriate methods 191
Reliability and validity 193
Choosing a sample 195
Writing a research proposal 198
Keeping a research diary or journal 198
Working with a research supervisor 199

16 Reviewing the literature 201
What is a literature review? 201
Why is it important to conduct a literature review? 202
What makes for a successful literature review? 202
How to go about reviewing the literature 209

17 Analysing and presenting data 214
What do we mean by analysis? 214
Getting organised 215
Quantitative methods of data analysis 216
Presenting quantitative data 223
Qualitative methods of data analysis 228
Presenting qualitative data 235

18 Writing up 237
Writing up a research project 237
Finding a 'voice' when writing up research 244
Writing the voices of others 245
Sharing what you have learnt with others 245

Conclusion 249
Glossary 250
Bibliography 252
Index 266

INDEX

Added to a page number 'f' denotes a figure; 'g' denotes glossary and 't' denotes a table.

a priori codes 231, 250g
abstracts 238
  in written up research project 202
action research 2, 29, 31, 90–100, 162, 165, 192, 247
  collaborative nature 94–5, 99
  cycle 95–7
  defined 90–3
  designs 191
  possibilities and limitations 98–9
  practitioners *see* practitioner-researchers
activity codes 110
alternative hypotheses 187, 188, 250g
analytical writing practices 164, 165
anthropology 23, 250g
  see also social anthropology
appendices 243–4
  use in your research project 202
applied research 2
audio-recording 130
authenticity 19, 154, 177, 194
autobiographical 'I' 244–5
autobiography 159, 162
autoethnography 159, 167
axes (graphs) 226

baby biographies 82, 87
bar charts 227
'before' and 'after' designs 190
'before' and 'after' observations 112
bias, in research 87, 116, 159
biased questions, avoiding 141–2
bibliographies 210
  how to compile when writing up research 202, 208–9
biographical interviewing 120
birth cohort studies 65–7

case studies 81–9
  collective 85–6,86–7
  defined 81–2
  design 83–6
  historical background 82–3

introductions, to research reports 239
  how to write

journal articles 203–4
  referencing 209
journaling 158–67
  possibilities and limitations 166–7
  as a research tool 97, 160–4
  self as subject for study 158–9
journals
  defined 159–60
  reasons for keeping 198
  as vehicle for reflection 159, 160

laboratory experiments 17, 18
laboratory observations 104, 106
line graphs 226, 227f
listening, to young children 46–54
  child as researcher 52–4
  creative methods for 169–79
  drawings 173–5
    Mosaic Approach 177–9
    photography 171–3
    play 176–7
    story-telling and narrative approaches 177
  developing an inclusive approach 169–71
  development of interest in 46–9
  ethical issues 50–2
  levels of involvement 51–2
literature reviews 201–13
  defined 201–2
  finding literature 209–11
  importance of conducting 202
  section, research reports 239
  successful 202–9
  types of literature 204–5
longitudinal studies 62–3, 65–7, 190

market research 59
matched pair design 17
the mean 221
measurement, of quantitative data 220–1
measures of central tendency 221–3
the median 221–2
methodology
  see also qualitative methodology; quantitative methodology
mixed research designs 30–1, 58, 189
the mode 222
Mosaic Approach 177–9

narrative approaches 108–11, 177
naturalistic observations 106, 108–9, 116
naturalistic settings 25, 26, 28, 70, 71, 73
nominal data 227
nominal measurement 220
non-experimental designs 191
  see also surveys

non-participant observation 107
non-probability sampling 196
non-standardised interviews *see* unstructured interviews
non-statistical analysis 215
notes, organising 212
null hypotheses 187, 188, 251g
Nuremberg Code 34

objectivity 42, 78–9, 116
observation 23,29,43, 70,103–17
  in action research 97
  defining 105
  ethical difficulties 43
  ethnographic research 23, 70
  historical overview 103–4
  methodology 29
  recording information 114–16
  types of 106–14
observational study 105
observer bias 116
observer as participant 107
Oedipus conflict 82, 251g
official statistics 150–1, 155
open questions 122–3, 134, 135–6, 138, 219t
opportunity sampling 197
ordinal measurement 220

panel surveys 63
paradigms
  defined 10–11, 251g
  discussing, in research reports 239–40
  ethical considerations 40–1
  influence on ethical stance 7
  scientific methodology 12–14
  see also interpretivism; positivism; post-structuralism
participant observation 39, 107
participant as observer 107
participants
  choosing *see* samples; sampling
  effect on interview process 121
  empathy with 161
  voice of, in research reports 245
  see also children
participation, of children 46–7
participatory research 49, 50, 91, 169
percentages, using 223
photography 171–3
  see also cameras
pie charts 228
pilot phase, questionnaires 144
planning, research
  ethical considerations 41–2
  stages 183–4
play, as a research strategy 176–7
population
  in case studies 87
  choosing samples 195–6
  defined 251g
  documentary research 155
  qualitative research 24, 195
  quantitative research 195
  structured interviews 121
  survey designs 57, 58, 59, 62, 63–4
positive correlation 19
positivism 7, 9–10,18–19, 20–21,23,41,57,119,162,188
  control of variables 196
  experimental method, *see* experiments
  meaning and origins 11–12
  possibilities and limitations 20–1
  quantitative methodology 14–15
  validity and reliability 19
post-structuralism 7
postmodernism 31
power
  Foucauldian discourse analysis 234
  imbalances, in research 36, 39, 78
  issues, research methods 52
practitioner-researchers 93–5
  sharing research findings 247
praxis
  action research as 93, 98
  defined 251g
pre-test/post-test designs 190
presentation
  qualitative data 235
  quantitative data 223–8
  questionnaires 140–5
private correspondence 149–50
probability 188
probability sampling 62, 196
professional development
  journaling as tool for 160

through action research 94
prospective studies 63, 65–7, 190
protocols (interview) 121
public opinion polls 58
purposive selection 197

qualitative data
analysis 215, 228–35
coding 230–2
open questions 135–6
presentation 235
visual images 151
qualitative methodology 7
approaches 29–30
in case studies 86
characteristics 24–5
combining quantitative and 30–1
defined 251g
designs 191
non-structured approach 14
observations 107
reliability and validity 19, 194
synonymous with ethnography 23
text analysis 217
quantitative data 106, 114
analysis 215, 216–23
coding 217–18, 219t
from questionnaires 136
grouping 219–20
levels of measurement 220–1
presentation 223–8
see also statistics
quantitative methodology 7
in case studies 86
characteristics 14–15
combining qualitative and 30–1
defined 251g
designs 191
observations 106–7
reliability and validity 19, 193
'quantity' questions 136
quasi-experiments 18, 191
questionnaires 132–47
in action research 97
defined 132
ethical considerations/implications 41, 42
face-to-face questionnaires 146
interviews distinguished from 119
possibilities and limitations 146
purposes 132–4
question design 134–40
sending by email 146
sending by post 145
structured 41, 192
survey designs
design and writing 64
distribution 65
testing/piloting 65
telephone and face-to-face 146
questions, semi-structured interviews 122–3

random samples 196
range 251g
ranking (questions) 138
rating scales 137–8
ratio measurement 221
reasoning 10, 13
'reconnaissance' phase, action research 97
recording
camcorders 114,130
interviews 130
observational information 114–16
records 149
referencing 208–9
reflective journaling 164–6
reflective practitioner 160
reflexivity 25, 27, 70, 77, 158, 229, 251g
reliability 19, 193–4
coding data 218
defined 251g
of diaries 150
during data analysis 230
of interview research 130
of observations 106–7, 116
of survey data 62
triangulation *see* triangulation
repeated measure designs 17
defining 1–2
research cycle 185f
research designs 189–91
defined 251g
discussing, in research reports 240
experimental 17
mixed 30–1, 58, 189
observational 105
research findings

presenting 240–2
sharing with others 245–7
research projects
choice of method 11, 52, 170, 191–2
choosing a design 189–91
choosing a sample 195–7
hypotheses *see* hypotheses
planning stages 183–4
reliability and validity 193–5
research questions 187–9, 211
working with a supervisor 199
writing a research proposal 198
writing up *see* writing up
research proposals, writing 198
research questions
formulating 187–9
refining 211
research settings
naturalistic 25, 26, 28, 70, 71, 73
research topics 184–7
resource considerations 186
researchers
bias 87, 116, 159
children as 52–4
feminist 42
participant/non participant 107
positivist 192
relationships with children 178
vulnerability 39
see also ethnographers; interviewers; practitioner-researchers
respondent validity 232
respondents (questionnaire)
knowledge of characteristics 140–1
patterns of responding 142–3
socially acceptable responses 143
response data 163
response rates, to questionnaires 144–5
retrospective designs 190
risks, involvement of children 50

samples 195–7
sampling 19, 62, 192, 195, 196–7, 251g
sampling frame 63, 195, 196, 251g
sampling plans 64
scales 137–8, 220
scientific discoveries 11, 82
scientific method 7
confirmatory approach 13
experiments distinguished from 16
exploratory approach 13
key features 12
research wheel 12f
study of children 13–14
validity and reliability 19
self-selected samples 197
semantic differential grid 139–40
semi-structured questionnaires 216
significance, tests of 188
single case designs 84, 86
situationally-created self 26
snowball sampling 197
sound recorders 114
standardised interviews *see* structured interviews
statistical analyses 122, 188, 215
statistical packages 228
stratified sampling 196–7
structured interviews 120, 121–2, 124
structured observation 105, 106–7, 111–14
structured questionnaires 41, 192
supervisors, working with 199
surface meaning 155–6, 217
surveys 57–68
characteristics 58
defined 57–8
designing 61–5
early childhood research 65–8
large-scale 30, 66–7, 121
limitations 62
purposes 58–61
SWOT analysis 165
systematic observation 103–4
systematic sampling 196

tables
in data presentation 224–6
in questionnaires 139–40
target child observation 109–11
telephone interviews 128
telephone questionnaires 146
temporal stability 193
tests
meaningfulness, to children 51
of reliability 193–4
of significance 188

texts
  discourse analysis 156, 217, 233–4
  interviews as negotiated 123–4
theoretical sampling 197
thick description 25, 69
time frame 83
time samples 111–12
transformational research 247
trend studies 62–3
triangulation 30, 31, 64, 125, 194–5, 251g

United Nations Convention on the Rights of the Child (UNCRC) 46–7
unstructured interviews 120, 123–4

validity 19, 194–5
  defined 251g
  during data analysis 230
  interview research 130
  of reliability tests 193
  see also ecological validity; respondent validity
values, in ethnography 76, 78
variables 15–16
  control of 16, 28, 121, 196, 217
  standardised 107
  see also confounding variables; dependent variables; independent variables
vulnerability
  of researchers 39
  see also 'competent yet vulnerable child'; marginalised groups; other/otherness

withdrawal of consent 38
writing
  as central to action research 162
  research proposals 198
  see also journaling
writing up 237–48
  ethical considerations 43
  finding a 'voice' 244–5
  report structure 237–44
  sharing findings with others 245–7
  the voices of others 245
