OCCUPATIONAL SAFETY
AND HEALTH
For Technologists, Engineers, and Managers

SEVENTH EDITION

DAVID L. GOETSCH
President and CEO, The Institute for Organizational Excellence
# BRIEF CONTENTS

**PART 1 HISTORICAL PERSPECTIVE AND OVERVIEW**  
1 Safety and Health Movement, Then and Now   3  
2 Accidents and Their Effects  18  
3 Theories of Accident Causation  32  
4 Roles and Professional Certifications for Safety and Health Professionals  51  
5 Safety, Health, and Competition in the Global Marketplace  77

**PART 2 LAWS AND REGULATIONS**  87  
6 The OSH Act, Standards, and Liability  89  
7 Workers' Compensation  137  
8 Accident Investigation and Reporting  165  
9 Product Safety and Liability  181

**PART 3 THE HUMAN ELEMENT**  199  
10 Ergonomic Hazards: Musculoskeletal Disorders (MSDs) and Cumulative Trauma Disorders (CTDs)  201  
11 Stress and Safety  233  
12 Safety and Health Training  244  
13 Violence in the Workplace  276

**PART 4 HAZARD ASSESSMENT, PREVENTION, AND CONTROL**  299  
14 Mechanical Hazards and Machine Safeguarding  301  
15 Falling, Impact, Acceleration, Lifting, and Vision Hazards  322  
16 Hazards of Temperature Extremes  356  
17 Pressure Hazards  370  
18 Electrical Hazards  383  
19 Fire Hazards and Life Safety  402  
20 Industrial Hygiene and Confined Spaces  429  
21 Radiation Hazards  480  
22 Noise and Vibration Hazards  497  
23 Computers, Automation, and Robots  522  
24 Bloodborne Pathogens and Bacterial Hazards in the Workplace  539
PART 5 MANAGEMENT OF SAFETY AND HEALTH  563

25 Preparing for Emergencies and Terrorism  565
26 Ethics and Safety  593
27 Hazard Analysis/Prevention and Safety Management  606
28 Promoting Safety  629
29 Environmental Safety and ISO 14000 (Environmental Management)  648
30 TSM: Total Safety Management in a Quality Management Setting  681
31 Establishing a Safety-First Corporate Culture  694
PART 1 HISTORICAL PERSPECTIVE AND OVERVIEW  1

1 Safety and Health Movement, Then and Now  3
   Developments before the Industrial Revolution  3
   Milestones in the Safety Movement  4
   Tragedies That Have Changed the Safety Movement  6
   Role of Organized Labor  9
   Role of Specific Health Problems  9
   Development of Accident Prevention Programs  11
   Development of Safety Organizations  12
   Safety and Health Movement Today  14
   Integrated Approach to Safety and Health  14
   New Materials, New Processes, and New Problems  15
   Rapid Growth in the Profession  15

2 Accidents and Their Effects  18
   Costs of Accidents  19
   Accidental Deaths in the United States  19
   Accidents versus Other Causes of Death  20
   Work Accident Costs and Rates  21
   Time Lost Because of Work Injuries  21
   Deaths in Work Accidents  22
   Work Injuries by Type of Accident  22
   Death Rates by Industry  22
   Parts of the Body Injured on the Job  23
   Chemical Burn Injuries  24
   Heat Burn Injuries  24
   Repetitive Strain/Soft-Tissue Injuries  25
   Estimating the Cost of Accidents  26
   Global Impact of Accidents and Injuries  29

3 Theories of Accident Causation  32
   Domino Theory of Accident Causation  32
   Human Factors Theory of Accident Causation  34
   Accident/Incident Theory of Accident Causation  36
   Epidemiological Theory of Accident Causation  38
CONTENTS

Systems Theory of Accident Causation  40
Combination Theory of Accident Causation  42
Behavioral Theory of Accident Causation  44
Drugs and Accident Causation  45
Depression and Accident Causation  45
Management Failures and Accident Causation  47
Obesity and Accident Causation  48

4 Roles and Professional Certifications for Safety and Health Professionals  51
Modern Safety and Health Teams  51
Safety and Health Manager  52
Engineers and Safety  60
Industrial Hygienist  65
Health Physicist  65
Occupational Physician  66
Occupational Health Nurse  67
Risk Manager  68
Certification of Safety and Health Professionals  69
Emerging Role of Safety Professionals  73

5 Safety, Health, and Competition in the Global Marketplace  77
Competitiveness Defined  77
Productivity and Competitiveness  79
Quality and Competitiveness  81
How Safety and Health Can Improve Competitiveness  81

PART 2 LAWS AND REGULATIONS  87

6 The OSH Act, Standards, and Liability  89
Rationale for the OSH Act  89
OSHA's Mission and Purpose  90
OSHA Act Coverage  90
OSHA Standards  91
OSHA's Record Keeping and Reporting  96
Keeping Employees Informed  102
Workplace Inspections and Enforcement  102
OSHA's Enhanced Enforcement Policy  103
Citations and Penalties  104
Appeals Process  106
State-Level OSHA Programs  107
Services Available from OSHA  107
Employer Rights and Responsibilities  111
Employee Rights and Responsibilities  112
Keeping Up-to-Date on OSHA  113
Problems with OSHA  113
Other Agencies and Organizations  114
OSHA's General Industry Standards  119
OSHA's Maritime Standards  126
OSHA's Construction Standards  127
Standards and Codes 128
Laws and Liability 130

7 Workers' Compensation 137
Overview of Workers' Compensation 137
Historical Perspective 140
Workers' Compensation Legislation 141
Modern Workers' Compensation 142
Workers' Compensation Insurance 144
Resolution of Workers' Compensation Disputes 145
Injuries and Workers' Compensation 146
Disabilities and Workers' Compensation 147
Monetary Benefits of Workers' Compensation 151
Medical Treatment and Rehabilitation 153
Medical Management of Workplace Injuries 153
Administration and Case Management 154
Cost Allocation 155
Problems with Workers' Compensation 156
Spotting Workers' Compensation Fraud and Abuse 156
Future of Workers' Compensation 157
Cost-Reduction Strategies 159

8 Accident Investigation and Reporting 165
Types of Accident Investigations 165
When to Investigate 166
What to Investigate 166
Who Should Investigate 168
Conducting the Investigation 169
Interviewing Witnesses 171
Reporting Accidents 173
Ten Accident Investigation Mistakes to Avoid 177

9 Product Safety and Liability 181
Product Liability and the Law 181
Developing a Product Safety Program 186
Evaluating the Product Safety Program 187
Role of the Safety and Health Professional 188
Quality Management and Product Safety 189
Product Safety Program Record Keeping 190
User Feedback Collection and Analysis 191
Product Literature and Safety 192
Product Recalls and Safety Professionals 193

PART 3 THE HUMAN ELEMENT 199

10 Ergonomic Hazards: Musculoskeletal Disorders (MSDs) and Cumulative Trauma Disorders (CTDs) 201
Ergonomics Defined 201
Human Factors and Ergonomic Hazards 202
Factors Associated with Physical Stress 203
Ergonomics: A Political Football 205
OSHA's Voluntary Ergonomics Guidelines 206
Worksite Analysis Program for Ergonomics 208
Hazard Prevention and Control 213
Medical Management Program 214
Training and Education 217
Common Indicators of Problems 217
Identifying Specific Ergonomic Problems 218
Ergonomic Problem-Solving Strategies 220
Economics of Ergonomics 225
Cumulative Trauma Disorders (CTDs) 226
Participatory Ergonomics 230

11 Stress and Safety 233
Workplace Stress Defined 233
Sources of Workplace Stress 234
Human Reactions to Workplace Stress 236
Measurement of Workplace Stress 237
Shift Work, Stress, and Safety 237
Improving Safety by Reducing Workplace Stress 238
Stress in Safety Managers 240
Stress and Workers' Compensation 241

12 Safety and Health Training 244
Rationale for Safety and Health Training 244
Education and Training Requirements 248
Safety and Health Professionals as Trainers 251
Preparing Safety and Health Instruction 253
Presenting Safety and Health Instruction 254
Applying Safety and Health Instruction 260
Evaluating Safety and Health Instruction 260
Training Supervisors 261
Training New and Transferred Employees 263
Job Safety Analysis as a Training Technique 264
Training Opportunities Available 266
Illiteracy and Safety 268
English as a Second Language Training Issues 270
OSHA Standards and Training 271

13 Violence in the Workplace 276
Occupational Safety and Workplace Violence: The Relationship 276
Workplace Violence: Definitions 277
Workplace Violence: Cases 277
Size of the Problem 279
Legal Considerations 280
Risk-Reduction Strategies 282
Contributing Social and Cultural Factors 284
OSHA's Voluntary Guidelines 285
PART 4 HAZARD ASSESSMENT, PREVENTION, AND CONTROL  299

14 Mechanical Hazards and Machine Safeguarding  301
   Common Mechanical Injuries  301
   Safeguarding Defined  304
   OSHA's Requirements for Machine Guarding  305
   Risk Assessment in Machine Operation  305
   Requirements for All Safeguards  307
   Point-of-Operation Guards  307
   Point-of-Operation Devices  311
   Machine Guarding Self-Assessment  311
   Feeding and Ejection Systems  312
   Robot Safeguards  313
   Control of Hazardous Energy (Lockout/Tagout Systems)  313
   General Precautions  318
   Basic Program Content  318
   Taking Corrective Action  319

15 Falling, Impact, Acceleration, Lifting, and Vision Hazards  322
   Causes of Falls  322
   Kinds of Falls  323
   Walking and Slipping  324
   Slip and Fall Prevention Programs  326
   OSHA Fall Protection Standards  327
   Ladder Safety  330
   What to Do after a Fall  332
   Monitor Fall Protection Equipment and Know Why It Fails  333
   Impact and Acceleration Hazards  333
   Lifting Hazards  342
   Standing Hazards  344
   Hand Protection  346
   Personal Protective Equipment  349
   Forklift Safety (Powered Industrial Trucks)  350

16 Hazards of Temperature Extremes  356
   Thermal Comfort  356
   Heat Stress and Strain  357
   Cold Stress  361
   Burns and Their Effects  364
   Chemical Burns  366

17 Pressure Hazards  370
   Pressure Hazards Defined  370
   Sources of Pressure Hazards  371
Boilers and Pressure Hazards 372
High-Temperature Water Hazards 372
Hazards of Unfired Pressure Vessels 373
Hazards of High-Pressure Systems 373
Cracking Hazards in Pressure Vessels 373
Nondestructive Testing of Pressure Vessels 375
Pressure Dangers to Humans 376
Decompression Procedures 377
Measurement of Pressure Hazards 378
Reduction of Pressure Hazards 378

18 Electrical Hazards 383
Electrical Hazards Defined 383
Sources of Electrical Hazards 386
Electrical Hazards to Humans 389
Detection of Electrical Hazards 390
Reduction of Electrical Hazards 391
OSHA's Electrical Standards 394
Electrical Safety Program 395
Electrical Hazards Self-Assessment 395
Prevention of Arc Flash Injuries 396
Training Requirements for Workers 397

19 Fire Hazards and Life Safety 402
Fire Hazards Defined 403
Sources of Fire Hazards 405
Fire Dangers to Humans 408
Detection of Fire Hazards 409
Reduction of Fire Hazards 410
Development of Fire Safety Standards 414
OSHA Fire Standards 415
Life Safety 415
Flame-Resistant Clothing 418
Fire Safety Programs 419
Explosive Hazards 420
OSHA's Firefighting Options 422
Self-Assessment in Fire Protection 423
Hot Work Program 423

20 Industrial Hygiene and Confined Spaces 429
Overview of Industrial Hygiene 429
Industrial Hygiene Standards 430
OSHA Act and Industrial Hygiene 431
Hazards in the Workplace 434
Toxic Substances Defined 436
Entry Points for Toxic Agents 436
Effects of Toxic Substances 438
Relationship of Doses and Responses 439
CONTENTS

23 Computers, Automation, and Robots 522
   Impact of Automation on the Workplace 522
   VDTs in Offices and Factories 523
   Human–Robot Interaction 525
   Safety and Health Problems Associated with Robots 526
   Safety and Health in Office Automation 528
   Industrial Medicine and Robots 529
   Technological Alienation in the Automated Workplace 531
   Minimizing the Problems of Automation 532
   Challenge for the Future 533

24 Bloodborne Pathogens and Bacterial Hazards in the Workplace 539
   Facts about AIDS 539
   Symptoms of AIDS 540
   AIDS in the Workplace 541
   Legal Concerns 543
   AIDS Education 546
   Counseling Infected Employees 547
   Easing Employees’ Fears about AIDS 548
   Protecting Employees from AIDS 548
   Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV) in the Workplace 550
   OSHA’s Standard on Occupational Exposure to Bloodborne Pathogens 553
   Preventing and Responding to Needlestick Injuries 557
   Methicillin-Resistant Staphylococcus Aureus (MRSA) in the Workplace 557

PART 5 MANAGEMENT OF SAFETY AND HEALTH 563

25 Preparing for Emergencies and Terrorism 565
   Rationale for Emergency Preparation 565
   Emergency Planning and Community Right-to-Know Act 566
   Organization and Coordination 567
   OSHA Standards 568
   First Aid in Emergencies 569
   How to Plan for Emergencies 572
   Planning for Workers with Disabilities 574
   Evacuation Planning 578
   Customizing Plans to Meet Local Needs 579
   Emergency Response 580
   Computers and Emergency Response 581
   Dealing with the Psychological Trauma of Emergencies 582
   Recovering from Disasters 583
   Terrorism in the Workplace 585
   Resuming Business after a Disaster 588

26 Ethics and Safety 593
   An Ethical Dilemma 593
   Ethics Defined 594
   Ethical Behavior in Organizations 596
Safety and Health Professionals' Role in Ethics 596
Company's Role in Ethics 598
Handling of Ethical Dilemmas 600
Questions to Ask When Making Decisions 601
Ethics and Whistle-Blowing 601

27 Hazard Analysis/Prevention and Safety Management 606
Overview of Hazard Analysis 606
Preliminary Hazard Analysis 607
Detailed Hazard Analysis 609
Hazard Prevention and Deterrence 616
OSHA Process Safety Standard 618
Risk Assessment 620
Safety Management Concerns 622
Best Practices in Safety Management 624
Occupational Health and Safety Management Systems 626

28 Promoting Safety 629
Company Safety Policy 629
Safety Rules and Regulations 630
Employee Participation in Promoting Safety 631
Safety Training 631
Suggestion Programs 632
Visual Awareness 633
Safety Committees 634
Personal Commitment to Workplace Safety 636
Employee-Management Participation 636
Incentives 637
Competition 639
Company-Sponsored Wellness Programs 639
Teamwork Approach to Promoting Safety 640
Persuasion as a Promotional Tool 643
Promoting Off-the-Job Safety 644

29 Environmental Safety and ISO 14000 (Environmental Management) 648
Safety, Health, and the Environment 648
Legislation and Regulation 649
Types of Environments 651
Role of Safety and Health Professionals 652
Hazards of the Environment 653
Hazardous Waste Reduction 657
Environmental Management System (EMS) 661
International Organization for Standardization (ISO) 665
ISO 14000 666
ISO 14000 Series of Standards 666
ISO 14001 Standard 668
ISO 14000 Success Story 676
A
AOHN. See American Association of Occupational Health Nurses (AAOHN)
Abatement, asbestos, 444
Abatement period, 106-107, 113, 118
ABC model, 44
ABET. See Accreditation Board for Engineering and technology (ABET)
ABIH. See American Board of Industrial Hygiene (ABIH)
Ability to pay, 131
ABOHN. See American Board for Occupational Health Nurses (ABOHN)
Absenteeism, 218, 531, 640
Absorption, 437-438
Abuse incidents of, 291
workers’ compensation fraud, 156-157
Abortion
incidents of, 291
Abuse
incidents of, 291
workers’ compensation fraud, 156-157
Abatement, asbestos, 444
Abatement period, 106-107, 113, 118
