INDEX

Note: Page numbers followed by t or f refer to the table or figure on that page.

A
A band 4
absolute training stimulus 72
acceleration 101, 144
acclimation 231
acclimatization 228, 231, 248
to cold 240-241
acetylcholine 6, 42
acetyl coenzyme A 30
achilles tendon exercises, posterior lower leg and 163
acid/base balance 36
acidosis 245
ACTH. See adrenocorticotropic hormone
actin 4
interaction with myosin 6f
action potential 5-6, 40
sequence of events 9f
active rest 133
active sites 5
acute exercise, cardiac output during 46-49
acute hyperthermia 244
acute mountain sickness (AMS) 256-257
acute phase proteins 62
exercise and 65
acute program variables 72
adaptations 132, 262
adaptive immune system 58
adductor exercises 164
adenosine diphosphate (ADP) 5, 28
adenosine triphosphate (ATP) 5, 28, 110, 122
ADH. See antidiuretic hormone
adherence 64
adhesions 159
adipocyte hypertrophy 275
adipose tissue 28
ADP. See adenosine diphosphate
adrenal cortex 22
glands 216
adrenocorticotropic hormone (ACTH) 22
aerobic capacity (VO2 max) 72, 110
comparison of sedentary individuals to elite runners 111
maximal 111f, 175-178
aerobic endurance 141
maximal 175-178
aerobic exercise, in cold 241
aerobic metabolism 7
aerobic performance 205-206
aerobic power 229
aerobic training 28
afterload 50
agility 78, 84, 180
development of 102-108
standards for 180
T and side shuffle drills 105f
agonist 10
muscle groups 79, 144
airway drying 286
alarm phase 192
albumin 196
aldosterone 24-25
allergens 284-285
all-or-none law 6
### Allosteric Modulation
- Allosteric modulation 16
- Acclimatization to 252-255
- Anaerobic performance and 252
- Athletic performance and 251-252
- Cardiovascular and hematological changes 254
- Cardiovascular response to 251
- Endurance performance and 251-252
- Maximal aerobic power changes 252f
- Metabolic and neuromuscular changes 254-255
- Metabolic response 251
- Physiological response to 249-251
- Respiratory changes 253-254
- Respiratory response to 250-251

### Altitude
- Altitude acclimatization to 252-255
- Acute exposure and 257-258
- Anaerobic performance and 252
- Athletic performance and 251-252
- Cardiovascular and hematological changes 254
- Cardiovascular response to 251
- Endurance performance and 251-252
- Maximal aerobic power changes 252f
- Metabolic and neuromuscular changes 254-255
- Metabolic response 251
- Physiological response to 249-251
- Respiratory changes 253-254
- Respiratory response to 250-251

### Anaerobic Performance
- Anaerobic performance 206-208
- Anaerobic power 86, 174-175, 206
- Anaerobic sports 94, 118
- Individual 98-100
- Anaerobic threshold 112
- Anaerobic training 28
- Physiological adaptations to high intensity 94f

### Anaphylatoxins
- Anaphylatoxins 62

### Anabolic Exercise
- Anabolic exercise 18
- Anabolic hormones 128
- Anabolic precursors 213
- Androgenic 216

### Antioxidants
- Antioxidants 191, 212
- Argile vasopressin (AVP) 24
- Arterial saturation (SaO2) 250
- Arterial system 43
- Arteries 43
- Arterioles 43
- Arteriovenous oxygen difference 49

### Asthma
- Asthma exercising with 289-289
- Factors modifying response to 286-288
- Nonpharmacological therapy 288-289
- Asthmogenic activities, high and low 289f
- Asthmogenicity 289
- Astrand cycle ergometer protocol 177f
- Athletic profile 170
- Atmosphere model 248f
- ATP. See adenosine triphosphate
- ATP-PC. See phosphagen energy system
- Atrial 40
- Atria synctium 41
- Atrioventricular node (AV node) 41
- Atrium 40
- Atrophy 127
- Autonomic nervous system 43
- AV node. See atrioventricular node
- AVP. See arginine vasopressin
- Axons 6

### B (Ballistic Movement)
- Ballistic movement 156
- Stretching 157-158
- Training 145-147
- Barometric pressure 248
- Oxygen pressure and 248f
- Basal metabolic rate 128
- Effect of concurrent training on 128-129
- Basketball 94-95
- Anaerobic program 96
- Speed and agility changes 108f
- Basophils 58
- B cells 58, 60
- Behind neck stretch 167
- Beta-adrenergic receptors 267
- β-adrenergic receptors 268
B-agonists 220-221, 288
B-blockers 224
B-carotene 191
B-cells 22, 274
B-hydroxy-B-methylbutyrate (HMB) 213, 222
B-oxidation 30
BIA. See bioelectrical impedance analysis
bicarbonate buffers 36
ions 46
loading 222
bicuspid valve 40
bi-cycle periodized training program 140f
bioelectrical impedance analysis (BIA) 182-184
bioenergetics 28
biomechanical analysis 78
blood doping 212, 223
run time effect 223f
blood lactate changes after detraining 75f
concentrations 37f
response in endurance athletes 113f
blood pressure 43-44, 53
response 49-50, 50f
systolic 43
blood volume 55,
body composition 72, 128, 180-184
men and women 181
body density, conversion to % body fat 183f
body fat computing percentage with regression equations 182-183
male and female descriptive data 181
body fluid losses, partitioning of 203f
body size 170
Bohr effect 45
Boyle's law 248
bradycardia 42
bronchi 44
bronchioles 44
bronchoconstriction 28
bronchospasm 284
Bruce treadmill protocol 176f
buffering capacity 250
bundle branches 42
bundle of His 41
butterfly stretch 164
butterflies exercises 165-166
C
Caffeine 213, 221-222
calcium 192
capillaries 43
capillary density 31-32, 255
catecholamines 46
carbohydrates 22, 188
metabolism 274
metabolism and exercise 277
oxidation and temperature 241f
supplementation exhaustion effect 199f
utilization 199-196, 194f
carbon dioxide 30
release 47f
transport 45-46
carbonic acid 46
cardiac cycle 40-41, 42f
cardiac drift 49
cardiac morphology 53-54
cardiac output 42-43
altitude effect 251
distribution 44f, 49-50
exercise intensity and 47f
heat effect 229
hypohydration effect 203
males 43f
training effect on 52-53
cardiovascular adaptations 52f
cardiovascular response 46-50, 52-54
cardiovascular system 40-44
carotid body 253
carryover 72
catabolic effect 18
catabolic hormones 128
catabolic pathways 213
catechoamines 22-24, 267, 277, 284
CD. See clusters of differentiation
ceruloplasmin 62
Charles' law 248
chemotactic 58
chemotaxis 62
chest exercises 166
chilblain 243, 246
cholesterol 216
chronic hypothermia 244
chronotropy 42
circulation, systemic 40
citrate synthase reaction 30
clenbuterol 220-221
cold anemia 192
cold environment exercise recommendations 246f
countermovement jump cold anesthesis 245
environmental exercise recommendations 246f
exercise performance in 241-243
immersion effect on peak torque 243f
medical concerns regarding injuries from 243-246
cold (continued)
metabolic rate during exposure to 239f
physiological responses to 238-240
stress, heat loss, and 238

collagen 159
competitive phase 132
complement
exercise and 65
system 58, 61-62
compound setting 79
concentric hypertrophy 54
concentric muscle action 78
concentric training 144
concurrent strength, effect on VO2 max 122
concurrent training 122

effects on trained subjects 124f
effects on untrained subjects 124f
hormonal and muscle fiber response 125f
conditioning 98
conduction 41-42, 228
conductive mechanisms 238
connective tissue 4, 156
contraction
phase 40
velocity 170
convection 228
convective mechanisms 238
core body temperature 228, 238
cortisol 17, 22-23, 128, 266
Costill and Fox treadmill protocol 176f
Countermovement Jump (CMJ) 145f, 146
C-reactive protein 62
Creatine 28, 212
kinase 28
supplementation 213-214
body mass changes from 215
muscle mass effect 215f
muscle strength gains from 214f
performance and 214-215
side effects of 215
cross-bridges 4
cross-country runners
Division 1 training 117f
volume 118f
cross-reactivity 17
cross-training 113, 116-117
cyclo AMP 18
cycling, of anabolic steroids 217
cytokines 59-61
exercise and 65
functions 61f
proinflammatory 65
cytotoxicity 59

D
Dalton’s law 248
deamination 197
deep frostbite 245
degranulation 62
dehydration 24, 202
anaerobic power outputs and 205f
basketball performance and 205f
fluid regulatory response to 25f
psychological effects of and warning signs 204f
running times and 205f
dehydroepiandrosterone (DHEA) 220
dendrites 6
depolarization 5
desmosomes 40
DHEA. See dehydroepiandrosterone
diabetes
exercise and 277-281
effect on type 1 277
effect on type 2 279-281
treatment and management of 276-277
diabetes mellitus
overview 274-277
statistics on 274
type 1 274
type 2 274-276
diaphragm 44
diastasis 40
diastole 40
diastolic blood pressure 43
diffusion capacity 253
disaccharides 188
dissipation 228
distance runners training methods 117f
diuresis 251
dosing 216-217
double-leg lower-back stretch 166
down-regulation 17
of insulin 275
drag 252
duration 78
dynamic constant resistance 171
testing 172-173
training 82-83
dynorphins 26
dyperplasia 12

eccentric contraction 144
eccentric hypertrophy 53
eccentric muscle action 78
eccentric training 83
edema 246
Edgren side-step test 180f
