CONTENTS

INTRODUCTION ix

CHAPTER 1. Introduction to the Basic Chemistry and Concept of Textiles 1
   Textiles from Film 3

CHAPTER 2. Production of the Natural Fibres 8
   Fibres of Vegetable Origin 8
   Fibres of Animal Origin 20
   Fibres of Mineral Origin 30

CHAPTER 3. Fibre Manufacture 31
   Spinning 31
   Rayon 35
   Acetates 42
   Synthetic Polymers 47
      Nylons 48
      Polysters 51
      Acrylcs 55
   Shorter Notes on the Less Significant Fibres, in Terms of Quantities Produced 58

CHAPTER 4. Yarn Manufacture 64
   Traditional Spinning Methods 64
   Count and Twist 73
   Tow-to-top Conversion 76
   Break or Open-end Spinning 79
   Bulked and Textured Yarns 81
   Speciality Yarns 88

CHAPTER 5. Preparation of Yarn for Fabric Manufacture 92
   Packaging or Winding 96
   Warping 97
   Sizing 98
   Looming 99
## Contents

**CHAPTER 6.** Fabric Manufacture: Weaving

- The Conventional Loom and the Method of Weaving 102
- The Improvement of Conventional Looms and the Development of New Methods of Inserting the Weft 107
- Fabric Structures: Weaves 113

**CHAPTER 7.** Fabric Manufacture: Knitting

- The Different Knitting Constructions 118
- The Basic Mechanisms of Knitting and the Machines Used 127

**CHAPTER 8.** Fabrics Produced by Unconventional Methods

- Adhesive Bonding of Fibrous Webs 144
- The Production, Properties and Uses of Needle-bonded Fabrics 146
- The Production, Properties and Uses of Stitch-bonded Fabrics 147
- Spun-bonded Fabrics 153

**CHAPTER 9.** The Processing of Textiles: Conversion of Grey Cloth

- Purification and Preliminary Processing 155
- Coloration 159
- Finishing 170

**CHAPTER 10.** Properties—Fibres, Yarns and Fabrics 178

**CHAPTER 11.** Uses—Suitability for Purpose

- Clothing, including Fashion Articles 197
- Carpets, Upholstery and Soft Furnishings 203
- Household Linen, Towels and Blankets 207
- Industrial Uses 209

**CHAPTER 12.** Comfort in Wear

- Body and Skin Temperatures 212
- The “Feel” of Fabrics 212
- The “Warmth” of Fabrics 213
- The Uptake of Water Vapour 213
- “Sorption” Heat of Clothing 214
- The Uptake of Water 214
- The Development of Static Electricity 215

**CHAPTER 13.** Labelling

- Care Labelling 217
- Information of Importance Principally at the Point of Purchase 225

**CHAPTER 14.** The Making-up of Garments

- Choice of Linings and Accessories 228
- Cutting Out 230
- Sewing 230
### CHAPTER 15. Identification of Fibres

- The Burning Test 233
- Microscopic Examination 233
- Solubility and Swelling 234
- Staining Tests 237

### Glossary of Textile Terms Used in the Text 243

### Trade Marks Used in the Text 249

### Index 253
INDEX

A

Accessories, choice of 228
ACETATE FIBRES 42
End-uses
  clothing 200
  furnishings 207
  industrial 210
Formula 44
History 42
Production 43.
Acid dyes 162
Acids, effect of 191
Acrilan, see Acrylic fibres
ACRYLIC FIBRES 55
End-uses
  carpets and furnishings 203
  clothing 201
  industrial 210
High-bulk 77
Production
  Acrilan and Orlon 58
  Courtelle 56
Various forms of 55
Adhesive bonding of fibrous webs 144
Agilon 84
Air bulking 82
Air jet loom 109, 112
Alginate 58
Alkalis, effect of 191
Anti-felting treatments 189
Anti-shrink treatments 175
Anti-static agents 215
Arachne fabric production 143, 147
Arachne fabric uses 151
Asbestos 30
Atlas fabric (knitting) 126
Avisco Vinyon HH 59
Azoic dyes 163

B

Back filling 173
Ban-Ion process 84
Basic dyes 161
Bearded needle 129
Beetling 174
Bending length 193
Bicomponent yarns 89
Blankets, fibres used 208
Bleaching 156
Blend 7
Block printing 167
Blue C Nylon, see Nylon
Bobbin loader 109
Body and skin temperatures 212
Bonded fibre fabric
  Production 143, 144
  Uses 145
Brand-name labelling 225
Break spinning 79
Bri-Nylon, see Nylon
BULKED YARNS 81
  Air bulking 82
  Edge crimping 84
  False-twist process 86
  Gear crimping 83
  Knit-de-knit 82
  Stuffer-box crimping 84
Burning test for fibre identification 233

C

Calendering 172
Camel hair 27
Carbonizing 65
Carding 13, 66–68
Carding engine 67
Index

Care labelling 217
Carpets, suitable fibres and blends 203
Cashmere 27
CELLULOSIC FIBRES 8
Cotton 9
Fibre structure 40
Rayon 35
Celon, see Nylon
Chatham machine 146
Chemical resistance of fibres 190
Chlorination 174
Chlorofibres 59
Chromogen J 61
Chromophore group 161
Circular weaving 110
Clothing, fibres for end-use 197
Coloration J 59
Colour, theory of 159
Combing 13, 68
Comfort in wear 211
Compound needle 129
Continuous filament yarn 1
Converter 76
Copper number 157
Corfam 146
Coronizing 61
COTTON 9
Acetylated cotton 14
Bleaching 156
Effect of chemicals 190
End-uses
clothing 198
household linen 207
soft furnishings 206
towels 208
Heat sensitivity 185
History 9
Mercerizing 15, 159
Processing 13, 64–73
Production 10
Scouring 155
Structure of fibre 13, 40
Cotton count 3
Count (yarn) 73
Courlene 62
Cournova 62
Courtelle, see Acrylic fibres
Crease recovery 193
Crease-resistant finishes 175
Crimplene 88, 202
Cross-sections of fibres 234
Curtain fabrics 206
Cut-and-sew garments 130
Cutting out 230
Dacron, see Polyester fibres
Denier 3
Design repeat 105
Desizing 155
Diazo-compounds 163
Dicel, see Acetate fibres
Diselmoth process 176
Direct dyes 162
Discharge printing 170
Dispersed dyes 162
Disposables 145
Dobby mechanism 105
Dope-dyeing 164
Doubling 70
Drafting 70
Dralon, see Acrylic fibres
Drape of fabrics 193
Draw-frame 71
Drawing 13, 70
Dry cleaning solvents 192
Dry spinning 33
Dyeing 163
Dyes 161

E

Edge crimping 84
Effect yarns 82, 88
Elasticity 181
Elastofibres, general 60
End-uses 203
Embossing 174
Enkalon, see Nylon
Exhaustion dyeing 164
Extensibility 180
Extract 22

F

Fabric distortion 184, 190
FABRIC MANUFACTURE
Knitting 118
Unconventional methods 143
Weaving 102
False-twist process 86
Fashion fabrics 197
Fashioning 130
Feel of fabrics 193, 212
Fell of cloth 102
Felt 92
Felting shrinkage 189
Fiberwoven 143, 146
Fibre content labelling 226
Fibre dimensions 179
Fibre manufacture 31
Fibre sections 234
Fibre shape 2
Fibre strength 179

D
Index

Mewlon 63
Micro-organisms, attack on fibres 192
Microscopic examination of fibres 234
Milling 174
Mixture fabric 7
Modacrylic fibres 62
Mohair 27
Moisture absorption 182
Moisture, comfort factor 183, 214
Moisture regain 182
Mordants 162
Moth-proofing 176
Mungo 22

NATURAL FIBRES 8
Of animal origin 20
Of mineral origin 30
Of vegetable origin 8
Needle-bonded fabrics 143, 146
Needles (knitting) 127
Needles used for sewing 231
Noble combs 69
Non-woven fabrics 143
NYLON 47
High tenacity 50
History 47
Notation of types 49
Nylon 6 production 50
Nylon 66 production 49
Polymer structure 48
Uses
for carpets 204
for clothing 201
for sheets 208
industrial 210

O
Open-end spinning 79
Opening and mixing 65
Organic solvents, effect of 192
Orlon, see Acrylic fibres
Oxidizing agents 191

P
Pacific converter 77
Packaging 96
Pad dyeing 164
Parchmentizing 159
Perlon, see Nylon
Permanent pleating 189
Picking 104
Pigment printing 163
Pigments 163, 164

Pile fabrics 116
Pilling 209
Plain knitting 119
Plain weave and variations 114
Polyamides, see Nylon
POLYESTER FIBRES 51
Production of Terylene 53
Uses
Clothing 202
curtaining 207
industrial 210
Polynosic rayon 40
Polyolefin fibres 62
Polymurethanes 60
Polyvinyl alcohol fibres 63
Polyvinyl chloride fibres 59
Polyvinylidene chloride fibres 59
Poplin 114
Pressing 231
see also Iron settings and terminology
Printing 167
Proban finish 176, 195
Processing of grey cloth 154
Properties of fibres, yarns and fabrics 178
Proteins 63
Purification 155
Purl knitting 121

Q
Quality-mark labelling 225
QuoX 146

R
Raising 174
Rapier loom 111
Raycelon 89
RAYON 35
Crimped fibres 40
Fibre structure 40
High tenacity rayon 40
High wet modulus rayon 40
History 35
Low flammability fibre 195
Production, viscose process 36
Uses
carpets, upholstery and soft furnishings 203
clothing 199
industrial 209
Reactive dyes 163
Reemay 153
Relaxation shrinkage 175, 190
Repp 114
Resin finishes 175
Resist dyeing 170
Retting 16
Khovyl 59
Rib structure (knitting) 121
Ribbon filaments 91
Rilsan 49
Ring spinning 72
Roller printing 170
Rotating drum method of break spinning 81

S
Saran 60
Sateen weave 116
Satin weave 116
Scotchgard 177
Scouring 155
Screen printing 168
Semi-hard floorings 205
Sewing 230
Sewing threads, choice of 230
Shedding (fibre loss) 209
Shedding (in weaving) 104
Shetland wool 22
Shoddy 22
Shrink resistance 175
Shrinkage 189
Shoe upper materials 146
Silk 28
Fibre structure 29
History 28
Processing 29
Production 28
Uses 199
Weighting 29
Singeing 155
Sizing 98
Slub yarn 88
Snarl yarn 89
Softening 174
Solena 144, 229
Solubility of fibres 234
Sorption heat of clothing 214
Spanzelle 60, 203
Speciality yarns 88
Spectrum 160
Spin dyeing 164
Spinning
Man-made fibre production 31
Yarn formation 64, 71, 79
Split films for textiles 3
Spun-bonded fabrics 143, 153
Spun yarn 1
Staining, identification test 237
Starching 173
Static 183, 215
Stenter 172, 173

Stentering 172
Stitch-bonded fabrics 143, 147
Stitch size 231
Strength of fibres and fabrics 179
Stuffer-box crimping 84
Sulzer shuttleless weaving machine 112
Swelling, means of identification 234
Swelling of fibres and yarns 184
Symbol labels 224
Synthetic polymers, history of development 47

T
Taslan yarn 82
Teklan 62, 195
Teltag Informative Labelling Scheme 227
Tenacity 180
Tenasco 40
Tensile strength 179
Tentering, see Stentering
Terlenka, see Polyester fibres
Terylene, see Polyester fibres
Tex 3
Textured yarn 81
Thermoplasticity 187
Towels, fibres used 208
Tow-to-top conversion 76
Trade marks 5, 249
Triacetate fibres 47
Formula 44
History 42
Production 47
Uses 201
Tricel, see Triacetate fibres
Tricelon 89
Tricot 125
Trilobal filaments 90
Tuck stitch 124
Turbo stapler 79
Twill weave 115
Twist (yarn) 75
Tyvek 153

U
Ulstron 62
Unifil loom winder 109
Upholstery fabrics 203, 205
Urea-formaldehyde resin 175
Uses of fibres 197

V
Vat dyes 162
Velvet and velveteen 116
Vilene 144, 229
Index

Vincel 42
Vinyon 63
Vinyon 59

W

Wartmth of fabrics 194, 213
Warping 97
Warp-knitted fabric constructions 124
Washing temperatures 221
Water (uptake by fibres) 182, 214
Water imbibition 182
Water jet loom 109, 112
Water-proofing 176
Water-repellent fabrics 176
Water vapour uptake by fabrics 213
Weaves 113
Weaving 102
Conventional loom 102
Improvements to conventional loom 107
New methods of weft insertion 107, 111
Weft-knitted fabrics 121
Weighting 29
Wet spinning 33
Wicking 214, 215
Winch dyeing 167
Winding 96
Wool 21
Bleaching 158

Carbonizing 24
Carding 24
Count 23
Different types 21
Disulphide linkages 26
Effect of chemicals 190
End-uses blankets 208
carpets and upholstery 203
clothing 198
Felting 189
Fibre structure 24
Heat sensitivity 185
History 21
Production and processing 23
Salt linkages 26
Scouring 156
Woollen yarns 23
Worsted yarns 24
Wool mark 22

Y

Yarn manufacture 64
Carding 66
Combing 68
Drafting 70
Drawing 70
Preparatory processes 65
Spinning 71
