Health Promotion

Effectiveness, efficiency and equity

THIRD EDITION

Keith Tones and Sylvia Tilford
Faculty of Health and Environment, Leeds Metropolitan University, Leeds, UK
# CONTENTS

**INTRODUCTION** vii  
**INTRODUCTION TO SECOND EDITION** xii  

## PART ONE

1 **SUCCESSFUL HEALTH PROMOTION: THE CHALLENGE** 2  
   The problematic notion of health and its determinants 2  
   The social ecology of health 5  
   The inequalities issue 9  
   The Meaning of Health promotion 18  
   Upstream or downstream? The challenge of victim blaming 26  
   Health promotion models and their ideological basis 29  
   Health promotion and the prevention of disease 34  
   Health promotion and empowerment 39  
   An *Empowerment Model* of health promotion 49  
   Ideological divides, false dichotomies and the measurement of success 55  
   Evaluation and the meaning of success 59  
   Conclusions 67  
   References 68  

2 **SELECTING INDICATORS OF SUCCESS: THE IMPORTANCE OF THEORIES OF CHANGE** 74  
   The importance of theory 74  
   Programme planning: the place of research 76  
   Theory at the micro level 84  
   The 'Health Action Model' 89  
   The dynamics of self-empowerment 101  
   Health promotion interventions 107  
   Evaluation 113  
   Indicators and the proximal-distal chain of effects 124  
   Selecting indicators: the importance of theory 139  
   References 143  

3 **EVALUATION RESEARCH** 149  
   Introduction 149  
   Methodologies of evaluation 152
PART TWO

4 SETTINGS AND STRATEGIES
  The concept of health career
  The Settings Approach
  The Settings Approach: a somewhat contested concept?
  Problems for a Settings Approach
  Researching health promoting settings
  References

5 HEALTH PROMOTION IN SCHOOLS
  Introduction
  Schools and health
  Historical background and the emergence of the health promoting school
  Models of the health promoting school
  Ideologies of health education and health promotion in schools
  Evaluating health promotion in schools
  Schools as a context for evaluation research
  Policy – international and national
  Overall success of health promoting schools
  Conclusions
  References

6 HEALTH CARE SETTINGS
  Introduction
  Conceptions of health promotion and related activities
  General effectiveness of health promotion in primary care
  Hospitals
  Conclusion
  References

7 HEALTH PROMOTION IN THE WORKPLACE
  The workplace, health promotion and a settings approach
  Work and health
  Different perspectives on success

SUBJECT INDEX

A Su Salud programme 445-6
Absenteeism 315
Accident prevention 251
Acheson Report 51, 295, 488
Action research 115-16, 175-6, 178, 292-3, 414
Active participation 293-4
Adherence 295
Advertising 334
Advertising, sponsorship and smoking 341
Advertising unhealthy products 341
Aerosol model 342
Affect Balance Scale 126
Agenda setting 54--5
Agenda setting and media 363
AGHAST 386
Alcohol
effect of a campaign, N.E. England 381
effects of a campaign California 381-2
and consultative collaboration 379
Alma Ata 20-21, 221 263-5, 399, 401
Arnstein's ladder of participation 403
Attitudes, defined 95
Attitudes and values 95-7
Attitude change theory 109, 110
Audience segmentation 350
Availability heuristic 95
A-Z of public health advocacy 365
Beliefs – defined 92 ff.
attributions 93
about affect 98
about control 102
about control – a typology 107
and cancer 93-4
and risk taking 94-5
and susceptibility 94
Benefits of workplace health promotion 304-5
reduction in costs 304
increased productivity 304
Benefits of workplace programmes – employer perceptions 321
Beveridge's five giants 59
Biological transition and income
gearing 13, 17
Biological transition and psychology of control 17-18
Boise Project – healthy ageing 446-7
Brief interventions – and smoking cessation 140
Brief interventions in primary care 139-41
